SYLLABUS

M.SC. NURSING TWO YEAR POSTGRADUATE DEGREE COURSE

College Address : Gram Morodhat, Nemawar Road, Post. Bhavlia Khurd, Dist., INDORE - 452 016 (M.P.), Ph. : 0731-4013750, 4013751 E-mail : nursing@indexgroup.co.in • Visit us : www.indexgroup.co.in City Office : 104, Trishul Apartment 5, Sanghi Colony, A.B. Road, INDORE -08, Ph. : 0731-4215757, Fax : 0731-4044715

Philosophy

National Health Policy(NHP) 2002 emphasizes the need to prepare nurses to function in super-speciality areas who are required in tertiary care institutions, entrusting some limited public health functions to nurses after providing adequate training, and increase the ratio of degree holding vis a vis diploma holding nurses.

It is observed that there is an acute shortage of nursing faculty in under graduate and post graduate nursing programme in India

Indian Nursing Council believes that:

Post Graduate programme is essential to prepare nurses to improve the quality of nursing education and practice in India.

Post graduate programme in nursing builds upon and extends competence acquired at the graduate levels, emphasizes application of relevant theories into nursing practice, education, administration and development of research skills.

The programme prepares nurses for leadership position in nursing and health fields who can function as nurse specialists, consultants, educators, administrators and researchers in a wide variety of professional settings in meeting the National priorities and the changing needs of the society.

This programme provides the basis for the post masteral programme in nursing. Further the programme encourages accountability and commitment to life long learning which fosters improvement of quality care.

Aim

The aim of the postgraduate program in nursing is to prepare graduates to assume responsibilities as nurse specialists, consultants, educators, administrators in a wide variety of professional settings

Objectives

On Completion of the two year M.Sc Nursing programme, the graduate will be able to:-

- 1. Utilize/apply the concepts, theories and principles of nursing science
- 2. Demonstrate advance competence in practice of nursing
- 3. Practice as a nurse specialist.
- 4. Demonstrate leadership qualities and function effectively as nurse educator and manager.
- 5. Demonstrate skill in conducting nursing research, interpreting and utilizing the findings from health related research.

- 6. Demonstrate the ability to plan and effect change in nursing practice and in the health care delivery system.
- 7. Establish collaborative relationship with members of other disciplines
- 8. Demonstrate interest in continued learning for personal and professional advancement.

CURRICULUM

Duration

Duration of the course is 2 years for M.Sc. (N)

Available	52 weeks
Vacation	4 weeks
Examination	2 weeks
Gazetted holidays	3 weeks

Total weeks available 43 weeks 40 hours per week 1720 hours

Total hours for 2 years

3440 hours

1. Minimum pass marks shall be 50 % in each of the Theory and practical papers separately.

- 2. A candidate must have minimum of 80% attendance (irrespective of the kind of absence) in theory and practical in each subject for appearing for examination.
- 3. A candidate must have 100% attendance in each of the practical areas before award of degree
- 4. A candidate has to pass in theory and practical exam separately in each of the paper.
- 5. Candidate must pass in internal and external examinations in each of the papers separately.
- 6. If a candidate fails in either theory or practical paper he/she has to re-appear for both the papers (Theory and practical).
- 7. Maximum no. of attempts permitted for each paper is 3 including first attempt.
- 8. The maximum period to complete the course successfully should not exceed 4 (four) years
- 9. A candidate failing in more than two subjects will not be promoted to the IInd year.
- 10. No candidate shall be admitted to the subsequent IInd year examination unless the candidate has passed the Ist year examination.
- 11. Maximum number of candidates for all practical examination should not exceed 10 per day.
- 12. Provision of Supplementary examination should be made.
- 13. All practical examinations must be held in the respective clinical areas.
- 14. One internal and One external examiners(outside the University) should jointly conduct practical examination for each student
- 15. An examiner should be M.Sc (N) in concerned subject and have minimum of 3 (three) years post graduate teaching experience.
- 16. One internal and One external examiners(outside the University) should evaluate dissertation and jointly conduct viva-voce for each student
- 17. For Dissertation Internal examiner should be the guide and external examiner should be Nursing faculty / nursing expert in the same clinical speciality holding Ph.D./M.Phil/M.Sc. Nursing with a minimum of 3 years experience in guiding the research projects for Post Graduate students of Nursing.

NURSING EDUCATION

Placement : Ist Year

Hours of Instruction Theory 150 Hours Practical 150 Hours Total : 300Hours

Course Description

This course is designed to assist students to develop a broad understanding of Fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students will be able to:

- 1. Explain the aims of education, philosophies, trends in education and health: its impact on nursing education.
- 2. Describe the teaching learningprocess.
- 3. Prepare and utilize various instructional media and methods in teaching learning process.
- 4. Demonstrate competency in teaching, using various instructional strategies.
- 5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
- 6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
- 7. Plan and conduct continuing nursing education programs.
- 8. Critically analyze the existing teacher preparation programs in nursing.
- 9. Demonstrate skill in guidance and counseling.
- 10. Describe the problems and issues related to administration of nursing curriculum including selection and organization of clinicalexperience.
- 11. Explain the development of standards and accreditation process in nursing education programs.
- 12. Identify research priorities in nursingeducation.
- 13. Discuss various models of collaboration in nursing education and services.
- 14. Explain the concept, principles, steps, tools and techniques of evaluation.
- 15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude

Course Content

Units	Hours		Course Content
	Theory	Practical	
I	10		 Introduction : Education :Definition, aims, concepts, philosophies & their education implications, Impact of Social, economical, political & technological changes oneducation: Professional education Current trends and issues ineducation Educational reforms and National Educational policy, various educational commissions-reports Trends in development of nursing education in India
			Tooching Loorning Process
Π	20	30	 Teaching – Learning Process Concepts of teaching and learning: Definition, theories of teaching and learning, relationship between teaching and learning. Educational aims and objectives; types, domains, levels, elements and writing of educational objectives Competency based education(CBE) and outcome based education(OBE) Instructional design: Planning and designing the lesson, writing lesson plan : meaning, its need and importance, formats. Instruction strategies – Lecture, discussion, demonstration, simulation, laboratory, seminar, panel, symposium, problem solving, problem based learning (PBL), workshop, project, role-play(socio- drama), clinical teaching methods, programmed instruction, self directed learning(SDL), micro teaching, computer assisted instruction(CAI), computer assisted learning (CAL)
<pre>V</pre>			

Units	Hours		Course Content
	Theory	Practical	
III	10	10	 Instructional media and methods Key concepts in the selection and use of media in education Developing learning resource material using different media Instructional aids – types, uses, selection, preparation, utilization. Teacher's role in procuring and managing instructional Aids – Project and non-projected aids, multi media, video-tele conferencing etc
IV	10		 Measurement and evaluation: Concept and nature of measurement and evaluation, meaning, process, purposes, problems in evaluation and measurement. Principles of assessment, formative and summative assessment-internal assessment external examination, advantages and disadvantages. Criterion and norm referencedevaluation,
V	12	10	 Standardized and non-standardized tests : Meaning, characteristics, objectivity, validity, reliability, usability, norms, construction of tests- Essay, short answer questions and multiple choice questions. Rating scales, checklist, OSCE/OSPE(Objective structured clinical/practical examination) Differential scales, and summated scales, sociometry, anecdotal record, attitude scale, critical incident technique Question bank-preparation, validation, moderation by panel, utilization Developing a system for maintaining confidentiality
VI	8	5	 Administration, Scoring and Reporting Administering a test; scoring, grading versus marks Objective tests, scoring essay test, methods of scoring, Item analysis.
VII	12	6	 Standardized Tools □ Tests of intelligence aptitude, interest, personality, achievement, socio-economic status scale, tests for special mental and physical abilities and disabilities.

Units	Hours		Course Content
	Theory	Practical	
VIII	5	6	 Nursing Educational programs Perspectives of nursing education: Global and national. Patterns of nursing education and training programmes in India. Non-university and University programs: ANM, GNM, Basic B.Sc. Nursing, Post Certificate B.Sc. Nursing, M.Sc(N) programs, M.Phil and Ph.D) in Nursing, post basic diploma programs, nurse practitioner programs.
IX	12	25	 Continuing Education in Nursing Concepts – Definition, importance, need scope, principles of adult learning, assessments of learning needs, priorities, resources. Program planning, implementation and evaluation of continuingeducation programs. Research in continuing education. Distance education in nursing.
X	10	10	 Curriculum Development Definition, curriculum determinants, process and steps of curriculum development, Curriculum models, Types and framework. Formulation of philosophy, objectives, selection and organization of learning experiences; master plan, course plan, unit plan. Evaluation strategies, process of curriculum change, role of students, faculty, administrators, statutory bodies and other stakeholders. Equivalency of courses: Transcripts, credit system.
XI	8		 Teacher preparation Teacher – roles & responsibilities, functions, characteristics, competencies, qualities, Preparation of professional teacher Organizing professional aspects of teacher preparation programs Evaluation: self and peer Critical analysis of various programs of teacher education in India.

Units	Hours		Course Content	
	Theory	Practical		
XII	10	5	 Guidance and counseling Concept, principles, need, difference between guidance and counseling, trends andissues. Guidance and counseling services : diagnostic and remedial. Coordination and organization of services. Techniques of counseling : Interview, case work, characteristics of counselor, problems in counseling. Professional preparation and training for counseling. 	
ХШ	15	10	 Administration of Nursing Curriculum Role of curriculum coordinator – planning, implementation and evaluation. Evaluation of educational programs in nursing-course and program. Factors influencing faculty staff relationship and techniques of working together. Concept of faculty supervisor (dual) position. Curriculum research in nursing. Different models of collaboration between education and service 	
XIV	10		 Management of nursing educational institutions Planning, organizing, staffing, budgeting, recruitment, discipline, public relation, performance appraisal, welfare services, library services, hostel, 	
XV	5	5	 Development and maintenance of standards and accreditation in nursing education programs. Role of Indian Nursing Council, State Registration Nursing Councils, Boards and University. Role of Professional associations and unions. 	

Activities :

- Framing philosophy, aims and objectives.
- Lesson Planning.
- Micro teaching-2.
- Conduct practice teachings using different teaching strategies -10 (like lecture cum discussion, demonstration- lab method, fieldtrips, seminars, project, role play, panel discussion, clinical methodsetc)
- Preparation and utilization of instructional Aids using differentmedia.
- Develop course plans, unit plans, rotation plans.
- Conduct a continuing education workshop.
- Annotated bibliography.
- Critical evaluation of any nursing education program offered by a selected institution.
- Planning and Organizing field visits.

- Educational visits.
- Field visits (INC/SNRC) to get familiar with recognition/registration process.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
- Observe and practice application of various non-standardized tests (intelligence, Aptitude, Personality, Sociometry, physical & mental disabilities tests.)

Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits
- Workshop

ADVANCE NURSINGPRACTICE

Placement: 1st Year

Hours of Instruction Theory 150 Hours Practical 200 Hours Total : 350Hours

Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives:

At the end of the course the students will be able to:

- 1. Appreciate and analyze the development of nursing as aprofession.
- 2. Describe ethical, legal, political and economic aspects of healthcare delivery and nursing practice.
- **3.** Explain bio- psycho- social dynamics of health, life style and health care delivery system.
- 4. Discuss concepts, principles, theories, models, approaches relevant on nursing and their application.
- 5. Describe scope of nursing practice.
- 6. Provide holistic and competent nursing care following nursing process approach.
- 7. Identify latest trends in nursing and the basis of advance nursing practice.
- 8. Perform extended and expanded role of nurse.
- 9. Describe alternative modalities of nursing care.
- 10. Describe the concept of quality control in nursing.
- **1**. Identify the scope of nursing research.
- 12. Use computer in patient care delivery system and nursing practice.
- 13. Appreciate importance of self development and professional advancement.

Course Content

Unit	Hours	Content
Ι	10	 Nursing as a Profession History of development of nursing profession, characteristics, criteria of the profession, perspective of nursing profession-national, global Code of ethics(INC), code of professional conduct(INC), autonomy and accountability, assertiveness, visibility of nurses, legal considerations, Role of regulatory bodies Professional organizations and unions-self defense, individual and collective bargaining Educational preparations, continuing education, career opportunities, professional advancement & role and scope of nursing education. Role of research, leadership and management. Quality assurance in nursing (INC). Futuristic nursing.
II	5	 Health care delivery Health care environment, economics, constraints, planning process, policies, political process vis a vis nursing profession. Health care delivery system- national, state, district and local level. Major stakeholders in the health care system-Government, non-govt, Industry and other professionals. Patterns of nursing care delivery in India. Health care delivery concerns, national health and family welfare programs, inter-sectoral coordination, role of non- governmental agencies. Information, education and communication (IEC). Tele-medicine.
Ш	10	 Genetics Review of cellular division, mutation and law of inheritance, human genome project ,The Genomic era. Basic concepts of Genes, Chromosomes & DNA. Approaches to common genetic disorders. Genetic testing – basis of genetic diagnosis, Pre symptomatic and predisposition testing, Prenatal diagnosis & screening, Ethical, legal & psychosocial issues in genetic testing. Genetic counseling. Practical application of genetics in nursing.
IV	10	 Epidemiology Scope, epidemiological approach and methods, Morbidity, mortality, Concepts of causation of diseases and their screening, Application of epidemiology in health care delivery, Health survelliance and health informatics Role of nurse

Unit	Hours	Content
V	20	 Bio-Psycho social pathology Pathophysiology and Psychodynamics of disease causation Life processes, homeostatic mechanism, biological and psycho-social dynamics in causation of disease, life style Common problems: Oxygen insufficiency, fluid and electrolyte imbalance, nutritional problems, hemorrhage] and shock, altered body temperature, unconsciousness, sleep pattern andits disturbances, pain, sensory deprivation. Treatment aspects: pharmacological and pre- postoperative care aspects, Cardio pulmonary resuscitation. End of life Care Infection prevention (including HIV) and standard safety measures, bio-medical waste management. Role of nurse- Evidence based nursing practice; Best practices Innovations in nursing Overview of COVID-19 infections. Epidemiology, infection process, clinical manifestations, diagnosis, treatment and dietetics. Nursing Assessment –History and Physical assessment Control and eradication of COVID-19
VI	20	 Philosophy and Theories of Nursing Values, Conceptual models, approaches. Nursing theories: Nightingale's, Hendersons's, Roger's, Peplau's, Abdella's, Lewine's, Orem's, Johnson's, King's, Neuman's, Roy's, Watson parsce, etc and their applications, Health belief models, communication and management, etc Concept of Selfhealth. Evidence based practice model.
VIII	10	 Nursing process approach Health Assessment- illness status of patients/clients (Individuals, family, community), Identification of health- illness problems, health behaviors, signs and symptoms of clients. Methods of collection, analysis and utilization of data relevant to nursing process. Formulation of nursing care plans, health goals, implementation, modification and evaluation of care.

		Psychological aspects and Human relations
		□ Human behavior, Life processes & growth and development,
		personality development, defense mechanisms,
		□ Communication, interpersonal relationships, individual and group, group
		dynamics, and organizationalbehavior,
		De Basic human needs, Growth and development, (Conception through

Unit	Hours	Content		
X	 Framework, scope and trends. Alternative modalities of care, alternative systems of complimentary therapies. Extended and expanded role of the nurse, in promotive curative and restorative health care delivery system in constitutions. Health promotion and primary health care. Independent practice issues, - Independent nurse-midwifery Collaboration issues and models-within an nursing. Models of Prevention, Family nursing, Home nursing, Gender sensitive issues and womenempowerment. Disaster nursing. Evidence based nursing practice- Best practices Trans-cultural nursing. 			
XI	25	Computer applications for patient care delivery system and nursing practice Use of computers in teaching, learning, research and nursing practice. Windows, MS office: Word, Excel, Power Point, Internet, literature search, Statistical packages, Hospital management information system: softwares.		

Practical

Clinical posting in the following areas:

- Specialty area- in-patient unit 2 weeks
- Community health center/PHC 2 weeks
- Emergency/ICU 2 weeks

Activities

- Prepare Case studies with nursing process approach and theoretical basis
- Presentation of comparative picture of theories
- Family case- work using model of prevention
- Annotated bibliography
- Report of field visits (5)

Methods of Teaching

- Lecture cum discussion
- Seminar
- Panel discussion
- Debate
- Case Presentations
- Exposure to scientific conferences
- Field visits

Methods of evaluation :

- Tests
- Presentation
- Seminar
- Written assignments

Advance nursing Procedures

Definition, Indication and nursing implications;

• CPR, TPN, Hemodynamic monitoring, Endotrcheal intubation, Tracheostoma, mechanical ventilation, Pacemaker, Hemodialysis, Peritonial dialysis, LP, BT Pleural and abdominal parecentasis OT techniques, Health assessment, Triage, Pulse oxymetry

CLINICAL SPECIALITY – I

MEDICAL SURGICAL NURSING

Placement: 1st Year

Hours of instruction Theory: 150 Hours Practical: 650 Hours Total : 800Hours

Course Description

This course is common for the students undergoing clinical speciality-II in neuro science nursing/cardiovascular & thoracic nursing/critical care nursing/oncology nursing/orthopaedic and rehabilitation nursing/nephro & urology nursing, gastroenterology nursing/ geriatric nursing.

It is designed to assist students in developing expertise and in depth knowledge in the field of medical Surgical Nursing. It will help students to appreciate the patient as a holistic individual and develop skill to function as a specialized Medical-Surgical Nurse. It will further enable the student to function as educator, manager and researcher in the field of Medical – Surgical Nursing.

Objectives

9.

At the end of the course the students will be able to:

- 1. Appreciate the trends & issues in the field of Medical Surgical Nursing as a speciality.
- 2. Apply concepts & theories related to health promotion.
- 3. Appreciate the client as a holistic individual.
- 4. Perform physical, psychosocial assessment of Medical Surgical patients.
- 5. Apply Nursing process in providing care to patients.
- 6. Integrate the concept of family centered nursing care withassociated disorder such as genetic, congenitaland long-term illness.
- 7. Recognize and manage emergencies with Medical-Surgical patients.
- 8. Describe various recent technologies & treatment modalities in the management of critically ill patients.

Appreciate the legal & ethical issues relevant to Medical – Surgical Nursing.

10. Prepare a design for layout and management of Medical – Surgical Units.

- 11. Appreciate the role of alternative systems of Medicine in care of patients.
- 12. Incorporate evidence based Nursing practice and identify the areas of research in the field of Medical – Surgical Nursing.
- 13. Recognize the role of Nurse practitioner as a member of the Medical – Surgical health team.
- 14. Teach Medical – Surgical Nursing to undergraduate nursing students & in-service nurses.

Unit Hours Content **Introduction:** Historical development of Medical- Surgical Nursing in India. Current status of health and disease burden in India. Current concept of health. Trends & issues in Medical – Surgical Nursing. Ethical & cultural issues in Medical – Surgical Nursing. Rights of patients. I 5 National health policy, special laws & ordinances relating to older people. National goals. Five yearplans. National health programs related to adult health. Health Assessment of patients History taking. Physical examination of various systems. Π 20 Nutritional assessment. Related investigations and diagnosticassessment. Care in hospital settings: Ambulatory care. Acute and Critical care. Long term care. Home Health Care. III 5 Characteristics, care models, practice settings, interdisciplinary team. Hospitalization - effects of hospitalization on the patient & family. Stressors & reactions related to disease process. Nursing care using Nursing process approach. CLINICAL SPECIALITY-I

OBSTETRIC AND GYNAECOLOGICALNURSING

Placement : 1st year

Hours of Instruction Theory : 150 Hours. Practical : 650 Hours. Total : 800 Hours.

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Obstetric and Gynaecological Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as educator, manager, and researcher in the field of Obstetric and Gynaecological nursing

Objectives

10.

At the end of the course the students will be able to:

- 1. Appreciate the trends in the field of midwifery, obstetrics and gynaecology as a speciality.
- 2. Describe the population dynamics and indicators of maternal and child health
- 3. Describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium.
- 4. Provide comprehensive nursing care to women during reproductive period and newborns.
- 5. Integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynaecological nursing.
- 6. Identify and analyze the deviations from normal birth process and refer appropriately.
- 7. Describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role ofnurse
- 8. Counsel adolescents, women and families on issues pertaining to pregnancy, child birth andlactation
- 9. Describe the role of various types of complementary and alternative therapies in obstetric and gynaecological nursing.
 - Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing.
- **1**. Describe the recent advancement in contraceptive technology and birth control measures
- 12. Appreciate the legal and ethical issues pertaining to obstetric and gynaecological nursing

Units	Hours	Content	
Ι	 Theories, models and approaches applied to midwifery practice Role and scope of midwifery practice: IndependentNurse midwifery practitioner Legal and Ethical issues: Code of ethics and standardsof midwifery practice, standing orders Evidence based midwifery practice Research priorities in obstetric and gynaecological nursing. 		
П	 Human reproduction Review of anatomy and physiology of human reproductive system: male and female Hormonal cycles Embryology Genetics, teratology and counseling Clinical implications 		
Ш	25	 Pregnancy Maternal adaptation : Physiological, psychosocial Assessment – Maternal and foetal measures Maternal measures:History taking , exmanination-General, physical and obstetrical measure, identification of high risk, Foetal measure- clinical parameters, biochemical- human estriol, Maternal Serum Alfa Feto Protein, Acetyl Choline esterase (AchE), Triple Test Aminocentesis, Cordocentesis, chorionic villus sampling (CVS)), Biophysical- (US IMAGING, Foetal movement count, Ultra Sonography, Cardiotocography, cardiotomography, Non Stress Test(NST), Contraction stress test(CST), amnioscopy, foetoscopy, Radiological examination, Interpretation of diagnostic tests and nursingimplications Nursing management of the pregnant women, minor disorders of pregnancy and management, preparation for child birth and parenthood, importance of institutional delivery , choice of birth setting, importance and mobilizing of transportation, prenatal counseling, role of nurse and crisis intervention, identification of high risk pregnancy and refer Alternative/complementary therapies 	

Units	Hours	Content				
	Normal Labour and nursing management:					
		□ Essential factors of labour				
		□ Stages and onset				
		First stage: Physiology of normallabour				
		• Use of partograph: Principles, use and critical analysis, evidence				
		based studies				
		Analgesia and anaesthesia in labour				
		Nursing management				
		Second stage				
		Physiology, intrapartum monitoring				
		Nursing management.				
IV	25	• Resuscitation, immediate newborn care and initiate breast feeding				
		(Guidelines of National neonatalogy forum of India)				
		Third stage				
		Physiology and nursing management				
		Fourth stage Observation aritical analysis and Nursing				
		Fourth stage – Observation, critical analysis and Nursing management.				
		Various child birth practice: water birth, position change etc				
		 Evidence based practice in relation to labour intervention 				
		· Evidence bused practice in relation to labour metvention				
		Role of nurse midwifery practitioner				
		• Alternative/complementary therapies

		 Physiology of puerperium 				
		 Physiology of lactation, lactation management, exclusive breast feeding 				
		,Baby friendly hospitalintitative(BFHI)				
		□ Assessment of postnatal women .				
		Minor discomforts and complications of puerperium				
V	20	□ Management of mothers during puerperium: Postnatal				
		exercises Rooming in, bonding, warm chain				
		Evidence based studies				
	Role of nurse midwifery practitioner					
		 Alternative/complementary therapies 				
•		Normal Newborn				
		 Physiology and characteristics of normalnewborn Physical and Behavioural assessment of newborn 				
	→	 Physical and Benavioural assessment of newborn Needs of newborn 				
*		 Essential newborn care: Exclusive breast feeding, Immunization, 				
VI	20	Hygiene measures, Newbornnutrition				
**	20	 Organization of neonatal care, services(Levels), transport, neonatal 				
		intensive care unit, organization and management of nursing services in				
		NICU				
		□ Observation and care of newborn				
		□ Parenting process				

Units	Hours	Content		
VII	10	Pharmoco dynamics in obstetrics Drugs used in pregnancy, labour, post partum andnewborn Calculation of drug dose and administration Effects of drugs used Anaesthesia and analgesia in obstetrics Roles and responsibilities of midwifery nurse practitioner Standing orders and protocols and use of selected life saving drugs and interventions of obstetric emergencies approved by the MOHFW Family welfare services Population dynamics Demography trends: vital statistics, calculation of indicators especially maternal and neonatal mortality rates and problems and other health problems Recent advancement in contraceptive technology Role of nurses in family welfare programmes in all settings Role of independent nurse midwiferypractitioner Family life education Evidence based studies Information, Education and Communication(IEC) Management information and evaluationsystem(MIES) Teaching and supervision of health team members		
VIII	10			
IX	Infertility Primary and secondary causes Diagnostic procedures Counseling: ethical and legal aspects of assisted reproductive technology(ART) Recent advancement in infertilitymanagement. Adoption procedures Role of nurses in infertilitymanagement			
x	5	Role of nurses in infertilitymanagement. Menopause □ Physiological, psychological and social aspects □ Hormone Replacement Therapy □ Surgical menopause □ Counseling and guidance Role of midwifery nurse practitioner		
XI	5	Abortion Types, causes Legislations, Clinical rights and professional responsibility Abortion procedures Complications Nursing management Role of midwifery nurse practitioner		

Total = 660 Hours 1 week = 30 Hours

S.No.	Deptt./Unit	No. of Week	Total Hours
1	Anetenatal Wards & OPDs	4	120
2	Labour Room	5	150
3	Postnatal Ward	2	60
4	Family Planning Clinics	2	60
5	PHC/Rural maternity settings	4	120
6	Gynae	2	60
7	Maternity OT	2	60
8	NICU	1	30
	Total	22 Weeks	660Hours

Procedures observed

- Diagnostic investigations : amniotcentecis, chordocentecis, chorionic villi sampling
- Infertility management: artificial reproduction : artificial insemination, invitro fertilization, and related procedures

Procedures assisted

• Medical termination of pregnancy

Procedures performed

- Antenatal assessment-20
- Postnatal assessment-20
- Assessment during labour : use of partograph 20
- Per vaginal examination-20
- Conduct of normal delivery-20
- Episiotomy and suturing-10
- Setting up of delivery areas
- Insertion of intra uterine devices(copper T)

Others

- Identification of high risk women and referral
- Health education: to women and their families
- Motivation of couples for planned parenthood

CLINICAL SPECIALTY -I

CHILD HEALTH (PAEDIATRIC) NURSING

Placement : Ist Year

Hours of Instruction Theory 150 Hours Practical 650 Hours Total : 800Hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Pediatric Nursing. It will help students to appreciate the child as a holistic individual and develop skill to function as neonatal and pediatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

At the end of the course the students will be ableto:

- 1. Appreciate the history and developments in the field of pediatrics and pediatric nursing as a specialty
- 2. Apply the concepts of growth and development in providing care to the pediatric clients and their families.
- 3. Appreciate the child as a holistic individual
- 4. Perform physical, developmental, and nutritional assessment of pediatric clients
- 5. Apply nursing process in providing nursing care to neonates & children
- 6. Integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
- 7. Recognize and manage emergencies in neonates
- 8. Describe various recent technologies and treatment modalities in the management of high riskneonates
- 9. Appreciate the legal and ethical issues pertaining to pediatric and neonatal nursing
- 10. Prepare a design for layout and management of neonatal units
- 11. Incorporate evidence based nursing practice and identify the areas of research in the field of pediatric/neonatalnursing
- 12. Recognize the role of pediatric nurse practitioner and as a member of the pediatric and neonatal healthteam
- **13.** Teach pediatric nursing to undergraduate students & in-service nurses.

Course Content

Unit	Hours	Content		
I	10	 Introduction Historical development of Pediatrics and Pediatric Nursing in India; Current status of child health in India; Trends in Pediatrics and Pediatric Nursing, Ethical and cultural issues in pediatric care Rights of children National health policy for children, special laws and ordinances relating to children. National goals, Five yearplans, National health programs related to childhealth. 		
Ш	10 Hrs	Assessment of pediatric clients History taking Developmental assessment Physical assessment Nutritional assessment Family assessment		
III	10	 Hospitalized child Meaning of hospitalization of the child, preparation for hospitalization, effects of hospitalization on the child and family Stressors and reactions related to developmental stages, play activities for ill hospitalized child. Nursing care of hospitalized child and family -principles and practices 		
IV	15	 Pre-natal Pediatrics Embryological and fetal development, Prenatal factors influencing growth and development offetus, Genetic patterns of common pediatric disorders, chromosomal aberrations, genetic assessment and counseling legal and ethical aspects of genetic, screening and counseling role of nurse in genetic counseling, Importance of prenatal care and role of pediatric nurse. 		
N	15	 Growth and Development of children Principles of growth and development, Concepts and theories of growth and development, Developmental tasks and special needs from infancyto adolescence, developmentalmilestones, Assessment of growth and development of pediatricclients, Factors affecting growth and development. 		
VI	15	 Behavioral Pediatrics and Pediatric Nursing Parent child relationship, Basic behavioral pediatric principles and specific behavioral pediatric concepts/disorders- maternal deprivation, failure 		

Unit	Hours	Content		
		 to thrive, child abuse, the battered child, Common behavioral problems and their management, Child guidance clinic. 		
VII	15	 Preventive Pediatrics and Pediatric Nursing Concept, aims and scope of preventive pediatrics, Maternal health and its influence on child health antenatal aspects of preventive pediatrics, Immunization, expanded program on immunization/ universal immunization program and cold chain, Nutrition and nutritional requirements of children, changing patterns of feeding, baby- friendly hospital initiative and exclusive breast feeding, Health education, nutritional education forchildren Nutritional programs National and international organizations related to child health, 		
VIII	30	 Neonatal Nursing New born baby- profile and characteristics of the newborn, Assessment of the new born, Nursing care of the new born at birth, care of the new born and family, High risk newborn- pre term and term neonate andgrowth retarded babies, Identification and classification of neonates with infections, HIV & AIDS, Ophthalmia neonatorum, congenital syphilis. High risk new born- Identification, classification and nursing management Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU. 		
IX	30	IMNCI (Integrated managementof neonatal and childhood illnesses)

CLINICAL SPECIALITY – I

MENTAL HEALTH (PSYCHIATRIC) NURSING

Placement : 1st Year

Hours of Instruction Theory 150 hours Practical 650 hours Total 800hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Psychiatric Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function psychiatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

At the end of the course the students will be able to:

- 1. Appreciate the trends and issues in the field of psychiatry and psychiatric nursing.
- 2. Explain the dynamics of personality development and human behaviour.
- 3. Describe the concepts of psychobiology in mental disorders and its implications for psychiatric nursing
- 4. Demonstrate therapeutic communications skills in all interactions
- 5. Demonstrate the role of psychiatric nurse practitioner in various therapeutic modalities
- 6. Establish and maintain therapeutic relationship with individual and groups
- 7. Uses assertive techniques in personal and professional actions
- 8. Promotes self-esteem of clients, others and self
- 9. Apply the nursing process approach in caring for patients with mental disorders
- 10. Describe the psychopharmacological agents, their effects and nurses role
- 11. Recognize the role of psychiatric nurse practitioner and as a member of the psychiatric and mental health team
- 12. Describe various types of alternative system of medicines used in psychiatric settings
- 13. Incorporate evidence based nursing practice and identify the areas of research in the field of psychiatric nursing

Course Content

Units	Hours	Content
		Introduction
Ι	15	 Mental Health and Mental Illness Historical perspectives Trends, issues and magnitude Contemporary practices Mental health laws/Acts National mental health program -National mental health authority, state mental health authority Human rights of mentally ill Mental Health/Mental Illness Continuum Classification of mental illnesses-ICD, DSM Standards of Psychiatric nursing Challenges and Scope of psychiatricnursing Multi-disciplinary team and role of nurse
Π	10	Role of psychiatric nurse- extended and expanded Concepts ofPsychobiology The Nervous System: An Anatomical Review
		 The Brain and limbic system Nerve Tissue Autonomic Nervous system Neurotransmitters Neuroendocrinology Pituitary, Thyroid Gland Circadian Rhythms Genetics Neuro psychiatric disorders Psychoimmunology Normal Immune response Implications for psychiatric Illness

CLINICAL SPECIALITY-I

COMMUNITY HEALTH NURSING

Placement : 1st Year

Hours of Instructions Theory 150 hours Practical 650 hours Total 800 hours

Course Description

The course is designed to assist students in developing expertise and in- depth understanding in the field of Community Health Nursing. It would help students to appreciate holistic life style of individuals, families & groups and develop skills to function as Community Health Nurse specialist/practitioner. It would further enable student to function as an educator, manager and researcher in the field of Community Health nursing.

Objectives

At the end of the course, the student will be ableto:

- 1. Appreciate the history and development in the field of Community Health and Community Health Nursing.
- 2. Appreciate role of individuals and families in promoting health of the Community.
- **3.** Perform physical, developmental and nutritional assessment of individuals, families and groups.
- 4. Apply the concepts of promotive, preventive, curative and rehabilitative aspects of health while providing care to the people.
- 5. Apply nursing process approach while providing care to individuals, families, groups and community.
- 6. Integrate the concepts of family centered nursing approach while providing care to the community.
- 7. Recognize and participate in the management of emergencies, epidemics and disasters.
- 8. Apply recent technologies and care modalities while delivering community health nursing care.
- 9. Appreciate legal and ethical issues pertaining to communityhealth nursing care.
- 10. Conduct community health nursing care projects.

Participate in planning, implementation and evaluation of various national health and family welfare programmes at local, state and the national level.

12. Incorporate evidence based nursing practice and identify the areas of research in the community settings.

- 13. Participate effectively as a member of Community Health team.
- 14. Coordinate and collaborate with various agencies operating in the community by using inter-sectoral approach.
- 15. Teach community health nursing to undergraduates, in-service nurses and the community health workers.
- 16. Demonstrate leadership and managerial abilities in community health nursing practice

Course Content

Unit	Hours	Content		
I	10	 Introduction Historical development of Community Health and Community health Nursing-World and India, various health and family welfare committees Current status, trends and challenges of CommunityHealth Nursing Health status of the Community-community diagnosis Scope of Community health Nursingpractice Ethical and legal issues Socio-cultural issues in Community health Nursing National Policies, plans and programmes National Population policy National Health and welfare Programmes National Health goals/ indicators/ Millenniumdevelopmental goals(MDG)/Strategies Planning process: Five year plans National Rural Health Mission Panchayat raj institutions 		
II	10	Health Concepts, issues Determinants Measurements Alternate systems for health promotion and managementof health problems Health economics Health technology Genetics and health Waste disposal Eco system		
ш	15	Population dynamics and control Demography Transition and theories of population National population policy National population programmes Population control and related programmes Methods of family limiting andspacing Research, Census, National Family Health Survey		

Unit	Hours	Content				
IV	30	 Community health Nursing Philosophy, Aims, Objectives, Concepts, Scope, Principles, Functions Community health Nursing theoriesand models Quality assurance: Community health Nursing standards, competencies, Monitoring community health nursing, nursing audits Family nursing and Family centered nursingapproach Family health nursing process Family health nursing process Family health assessment Diagnosis Planning Intervention Evaluation Nursing care for special groups: children, adolescents, adults, women, elderly, 				
		 physically and mentally challenged- Urban and rural population at large Community nutrition Concept, role and responsibilities of community health Nurse practitioners/nurse midwifery practitioners-decision making skills, professionalism, legal issues 				
V	45	 Maternal and neonatal care IMNCI(Integrated Management of Neonatal And Childhood Illnesses) module Skilled Birth Attendant (SBA)module 				
VI	15	 Disaster nursing (INC module on Reaching out: Nursing Care in emergencies) 				
VII	10	Information, education and communication IEC/BCC: Principles and strategies Communication Skills Management information and evaluation system: Recordsand reports Information technology Tele-medicine and tele-nursing Journalism Folk media				
VIII	15	 Health care delivery system: Urban, rural, tribal anddifficult areas Health organization: National, State, District, CHC, PHC, Sub Centre, Village - Functions, Staffing, pattern of assistance, layout, drugs, equipments and supplies, Roles and Responsibilities of DPHNO Critical review of functioning of various levels, evaluation studies, recommendations and nursing perspectives Alternative systems of medicine Training and supervision of health workers 				

Unit	Hours	Content		
		 Health agencies: NGO's, Rolesand functions Inter-sectoral coordination Public private partnership Challenges of health care deliverysystem 		

MALWANCHAL

1 Week = 30 Hours

S.No.	Deptt./Unit	No. of Week	Total Hours
1	Sub-centre, PHC, CHC	12	360 Hours
2	District family welfare bureau	1	30 Hours
3	Urban centers	6	180 Hours
4	Field visits	3	90 Hours
	Total	22 Weeks	660 Hours

Student Activities

- Identification of community leaders and resource persons(community mapping)
- Community health survey
- Community health nursing process- individual, family and special groups and community
- Counseling
- Health education campaign, exhibition, folk media, preparation of IEC materials
- Organising and participating in special clinics/camps and national health and welfare programmes-Organise atleast one health and family welfare mela/fair (all stalls of national health and family welfare activities should be included)
- Estimation of Vital health statistics -Exercise
- Drill for disaster preparedness
- Organise atleast one in-service education to ANM's/LHV/PHN/HW
- Nutrition Exercise on nutritional assessment on dietary planning, demonstration and education for various age groups
- Filling up of Records, reports and registers maintainedat SC/PHC/CHC
- Assist women in self breast examination
- Conduct antenatal examination
- Conduct vaginal examination
- Conduct deliveries
- Post natal visits
- Perform Episiotomy and suturing
- Prepare Pap smear
- Conduct Insertion/Removal of IUD
- Blood Slide preparation
- Field visits
- Maintenance of log book for various activities

NURSING RESEARCH ANDSTATISTICS

Placement: 1st Year

Hours of Instruction Theory 150 Hours Practical 100 Hours Total : 250Hours

Part-A : Nursing Research

Theory 100 Hours Practical 50 Hours Total : 250Hours

Course Description:

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

General Objectives:

At the end of the course, the students will be able to:

- 1. Define basic research terms and concepts.
- 2. Review literature utilizing various sources
- 3. Describe research methodology
- 4. Develop a research proposal.
- 5. Conduct a research study.
- 6. Communicate research findings
- 7. Utilize research findings
- 8. Critically evaluate nursing research studies.
- 9. Write scientific paper for publication.

Unit	Unit Hours		Course Content
Unit	Theory	Practical	
Ι	10		 Introduction: Methods of acquiring knowledge – problem solving and scientific method. Research – Definition, characteristics, purposes, kindsof research Historical Evolution of research in nursing Basic research terms Scope of nursing research: areas, problems in nursing, health and social research Concept of evidence based practice Ethics in research Overview of Research process
II	5	5	 Review of Literature Importance, purposes, sources, criteria for selection of resources and steps in reviewing literature.
ш	12		 Research Approaches and designs Type: Quantitative and Qualitative Historical, survey and experimental –Characteristics, types advantages and disadvantages Qualitative: Phenomenology, grounded theory, ethnography
IV	10	5	 Research problem: Identification of research problem Formulation of problem statement and research objectives Definition of terms Assumptions and delimitations Identification of variables Hypothesis – definition, formulation and types.
V	5	5	 Developing theoretical/conceptual framework. Theories: Nature, characteristics, Purpose and uses Using, testing and developing conceptual framework, models and theories.
VI	6		Sampling Population and sample Factors influencing sampling Sampling techniques Sample size Probability and sampling error Problems of sampling

.	Hours				
Unit	Theory	Practical	Course Content		
VII	20	10	 Tools and methods of Data collection: Concepts of data collection Data sources, methods/techniques quantitative and qualitative. Tools for data collection – types, characteristics and their development Validity and reliability of tools Procedure for data collection 		
VIII	5		Implementing research plan Pilot Study, review research plan (design)., planning for data collection, administration of tool/interventions, collection of data 		
IX	10	10	 Analysis and interpretation of data Plan for data analysis: quantitative and qualitative Preparing data for computer analysis and presentation. Statistical analysis Interpretation of data Conclusion and generalizations Summary and discussion 		
X	10		 Reporting and utilizing research findings: Communication of research results; oral and written Writing research report purposes, methods and style- vancouver, American Psychological Association(APA), Campbell etc Writing scientific articles for publication: purposes & style 		
XI	3	8	Critical analysis of research reports and articles		
XII	4	7	Developing and presenting a research proposal		

Activities:

- Annotated Bibliography of research reports andarticles.
- Review of literature of selected topic and reporting
- Formulation of problem statement, objective and hypothesis
- Developing theoretical/conceptualframework.
- Preparation of a sample research tool
- Analysis and interpretation of given data
- Developing and presentingresearch proposal
- Journal club presentation
- Critical evaluation of selected research studies
- Writing a scientific paper.

Method of Teaching

- Lecture-cum-discussion
- Seminar/Presentations
- Project
- Class room exercises
- Journal club

Methods of Evaluation

- Quiz, Tests (Term)
- Assignments/Term paper
- Presentations
- Project work

Internal Assessment

Techniques	Weightage (15marks)	and the second s

Part -B : Statistics

Hours of Instruction Theory 50 Hours Practical 50 Hours Total : 100Hours

See.

Course Description

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing.

General Objectives

At the end of the course the students will be able to:

- 1. Explain the basic concepts related to statistics
- 2. Describe the scope of statistics in health and nursing
- 3. Organize, tabulate and present data meaningfully.
- 4. Use descriptive and inferential statistics to predictresults.
- 5. Draw conclusions of the study and predict statistical significance of the results.
- 6. Describe vital health statistics and their use in health related research.
- 7. Use statistical packages for data analysis

TL.º4	Hours		
Unit	Theory	Practical	Course Content
I	7	4	 Introduction: Concepts, types, significance and scope of statistics, meaning of data, sample, parameter type and levels of data and their measurement Organization and presentation of data – Tabulation of data; Frequency distribution Graphical and tabular presentations.
Π	4	4	Measures of central tendency: □ Mean, Median, Mode
Ш	N4	5	 Measures of variability; Range, Percentiles, average deviation, quartile deviation, standard deviation
IV	3	2	 Normal Distribution: Probability, characteristics and application of normal probability curve; sampling error.

T T •/	Hours			
Unit Theory Practical Course Content		Course Content		
V	6	8	Measures of relationship: Correlation – need andmeaning Rank order correlation; Scatter diagram method Product moment correlation Simple linear regression analysis andprediction.	
VI	5	 Designs and meaning: Experimental designs Comparison in pairs, randomized block design, Latin squares. 		
VII	8	10	10 Significance of Statistic and Significance of difference between two Statistics (Testing hypothesis) 10 Non parametric test – Chi-square test, Sign, median test, Mann Whitney test. 10 Parametric test – 't' test, ANOVA, MANOVA, ANCOVA	
VIII	5	5	Use of statistical methods in psychology and education: □ Scaling – Z Score, Z Scaling □ Standard Score and T Score □ Reliability of test Scores: test-retest method, parallel forms, split half method.	
IX	4	2	 Application of statistics in health: Ratios, Rates, Trends Vital health statistics – Birth and death rates. Measures related to fertility, morbidity and mortality 	
X	4	8	Use of Computers for data analysis Use of statistical package. 	

Activities

- Exercises on organization and tabulation of data,
- Graphical and tabular presentation of data
- Calculation of descriptive and inferential statistics(chi square,t-test, correlation)
- Practice in using statistical package
- Computing vital health statistics

Methods of Teaching:

- Lecture-cum-discussion
- Demonstration on data organization, tabulation, calculation of statistics, use of statistical package, Classroom exercises, organization and tabulation of data,

• Computing Descriptive and inferential statistics; vital and health statistics and use of computer for data entry and analysis using statistical package.

Methods of Evaluation

• Test, Classroom statistical exercises.

Internal Assessment

Techniques

Weightage 10 marks

Test – (2 tests)

100%

NERSÍ MALMANCHAN

Placement : II Year

Hours of Instruction Theory 150 Hours Practical 150 Hours Total : 300Hours

Course Description

This course is designed to assist students to develop a broad understanding of Principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

- 1. Describe the philosophy and objectives of the health care institutions at various levels.
- 2. Identify trends and issues in nursing
- 3. Discuss the public administration, health care administration vis a vis nursing administration
- 4. Describe the principles of administration applied to nursing
- 5. Explain the organization of health and nursing services at the various levels/institutions.
- 6. Collaborate and co-ordinate with various agencies by using multi- sectoral approach
- 7. Discuss the planning, supervision and management of nursing workforce for various health care settings.
- 8. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursingcare
- 9. Identify and analyse legal and ethical issues in nursing administration
- 10. Describe the process of quality assurance in nursing services.
- 11. Demonstrate leadership in nursing at various levels

Unit	Hours	Content		
		Introduction		
I	10	 Philosophy, purpose, elements, principles and scope or administration Indian Constitution, Indian Administrative system vis a vis health care delivery system: National, State and Local Organisation and functions of nursing services and education at National, State , District and institutions: Hospital and Community Planning process: Five year plans, Various Committee Reports on health, State and National Health policies, national population policy, national policy on AYUSH and plans, 		
II	10	Management □ Functions of administration □ Planning and control □ Co-ordination and delegation □ Decision making – decentralization basic goals of decentralization. □ Concept of management □ Concept, types, principles and techniques □ Vision and Mission Statements □ Philosophy, aims and objective □ Current trends and issues in NursingAdministration □ Theories and models		
ш	15	Planning Planning process: Concept, Principles, Institutionalpolicies Mission, philosophy, objectives, Strategic planning Operational plans Management plans Programme evaluation and review technique(PERT), Gantt chart, Management by objectives(MBO) Planning new venture Planning for change Innovations in nursing Application to nursing service and education		
IV	 15 Organisation Concept, principles, objectives, Types and theories, Minimum requirements for organisation, Developing an organizational Structure, levels, organizational Effectiveness andorganizational Climate, Organising nursing services and patient care: Methods of patient assignment-Advantages and disadvantages, primary nursingcare, 			
		 Planning and Organising: hospital, unit and ancillary services(specifically central sterile supply department, laundry, kitchen, laboratory services, emergency etc) 		

Unit	Hours	Content	
		 Disaster management: plan, resources, drill, etc Application to nursing service and education 	
V	15	Human Resource for health Staffing Philosophy Norms: Staff inspection unit(SIU), Bajaj Committee, High power committee, Indian nursing council (INC) Estimation of nursing staff requirement- activity analysis Various research studies Recruitment: credentialing, selection, placement, promotion Retention Personnel policies Termination Staff development programme Duties and responsibilities of various category of nursing personnel Applications to nursing service and education	
VI	15	 Directing Roles and functions Motivation: Intrinsic, extrinsic, Creating motivating climate, Motivational theories Communication : process, types, strategies, Interpersonal communication, channels, barriers, problems, Confidentiality, Public relations Delegation; common delegationerrors Managing conflict: process, management, negotiation, consensus Collective bargaining: health care labour laws, unions, professional associations, role of nurse manager Occupational health and safety Application to 	
VII	10	Material management Concepts, principles and procedures Planning and procurement procedures: Specifications ABC analysis, VED (very important and essential daily use) analysis Planning equipments and supplies for nursing care: unit and hospital Inventory control Condemnation Application to nursing service and education	
VIII	15	Controlling Quality assurance – Continuous Quality Improvement Standards Models Nursing audit 	

Unit	Hours	Content	
		 Performance appraisal: Tools, confidential reports, formats, 	
		Management, interviews	
		Supervision and management: concepts and principles	
		 Discipline: service rules, self discipline, constructive versus destructive discipline, problem employees, disciplinary proceedings- enquiry etc 	
		 Self evaluation or peer evaluation, patient satisfaction, utilization review 	
		Application to nursing service and education	
		Fiscal planning	
		□ Steps Blen and non-plan zero hudgeting mid term enpresidel, expitel and revenue	
		 Plan and non-plan, zero budgeting, mid-term appraisal, capital and revenue Budget estimate, revised estimate, performancebudget 	
		 Budget estimate, revised estimate, performancebudget Audit 	
		□ Cost effectiveness	
		Cost accounting	
		Critical pathways

		Health economics	
		 Health insurance Budgeting for various units and levels Application 	
		Budgeting for various units and levels Application	
		to nursing service and education	
		Nursing informatics	
		 Trends General purpose 	
		 Use of computers in hospital and community 	
		 Patient record system 	
X	10	Nursing records and reports	
		 Management information and evaluation system(MIES) 	
		 E- nursing, Telemedicine, telenursing 	
		Electronic medical records	
		Leadership	
		Concepts, Types, Theories	
	The second	 Styles Manager behaviour 	
	NK	 Manager behaviour Leader behaviour 	
	Nø.	 Effective leader: Characteristics, skills 	
		□ Group dynamics	
XI	10	□ Power and politics	
		□ lobbying	
		 Critical thinking and decision making 	
		Stress management	
		Applications to nursing service and education	

Unit	Hours	Content	
Unit	Hours 10	Content Legal and ethical issues Laws and ethics Ethical committee Code of ethics and professional conduct Code of ethics and professional conduct Legal system: Types of law, tort law, and liabilities Legal issues in nursing: negligence, malpractice, invasion of privacy, defamation of character Patient care issues, management issues, employmentissues Medico legal issues Nursing regulatory mechanisms: licensure, renewal, accreditation	
		 Nursing regulatory mechanisms: licensure, renewal, accreditation Patients rights, Consumer protectionact(CPA) Rights of special groups: children, women, HIV, handicap, ageing Professional responsibility and accountability Infection control Standard safety measures 	

PRACTICALS

- 1. Prepare prototype personal files for staff nurses, faculty and cumulative records.
- 2. Preparation of budget estimate, Revised estimate andperformance budget.
- 3. Plan and conduct staff development programme.
- 4. Preparation of Organisation Chart
- 5. Developing nursing standards/protocols for various units.
- 6. Design a layout plan for speciality units /hospital, community and educational institutions
- 7. Preparation of job description of various categories of nursing personnel
- 8. Prepare a list of equipments and supplies for specialityunits
- 9. Assess and prepare staffing requirement for hospitals, community and educational institutions
- 10. Plan of action for recruitment process
- 11. Prepare a vision and mission statement for hospital, community and educational institutions
- 12. Prepare a plan of action for performance appraisal
- 13. Identify the problems of the speciality units and develop plan of action by using problem solving approach
- 14. Plan a duty roster for speciality units/hospital, community and educational institutions
- 15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurses notes, Official letters, curriculum vitae, presentations etc

- 16. Prepare a plan for disaster management
- 17. Group work
- 18. Field appraisal report

MALWANCHAL

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING

SUB SPECIALITY - CARDIO VASCULAR AND THORACIC NURSING

Placement : II year

Hours of Instruction Theory : 150 hours. Practical : 950 hours. Total : 1100hours.

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of cardiovascular and thoracic nursing. It will help students to develop advanced skills for nursing intervention in various cardio medical and surgical conditions. It will enable the student to function as Cardio vascular and Thoracic Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of cardio vascular and thoracic nursing.

Objectives

At the end of the course the students will be able to:

- 1. Appreciate trends and issues related to cardio vascular and thoracic Nursing.
- 2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of cardio vascular and thoracicconditions
- **3.** Participate in national health programs for health promotion, prevention and rehabilitation of patients with cardio vascular and thoracic conditions
- 4. Perform physical, psychosocial & spiritual assessment
- 5. Assist in various diagnostic, therapeutic and surgical procedures
- 6. Apply nursing process in providing comprehensive care to patients with cardio vascular and thoracic conditions
- 7. Demonstrate advance skills/competence in managing patients with cardio vascular and thoracic conditions including Advance Cardiac Life Support.
- 8. Describe the various drugs used in cardio vascular and thoracic conditions and nurses responsibility
- 9. Demonstrate skill in handling various equipments/gadgets used for critical care of cardio vascular and thoracic patients
- 10. Appreciate team work & coordinate activities related to patient care.
- 11. Practice infection control measures.
- 12. Identify emergencies and complications & take appropriate measures

- 13. Discuss the legal and ethical issues in cardio vascular and thoracic nursing
- 14. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.
- 15. Appreciate the role of alternative system of medicine in care of patient
- 16. Incorporate evidence based nursing practice and identify the areas of research in the field of cardio vascular and thoracic nursing
- 17. Identify the sources of stress and manage burnout syndrome among health care providers.
- 18. Teach and supervise nurses and allied health workers.
- **19.** Design a layout of ICCU and ICTU and develop standards for cardio vascular and thoracic nursingpractice.

Content Outline

Unit	Hours	Content		
I	5	 Introduction Historical development, trends and issues in the field of cardiology. Cardio vascular and thoracic conditions – major healthproblem. Concepts, principles and nursingperspectives Ethical and legal issues Evidence based nursing and its application in cardio vascular and thoracic nursing(to be incorporated in all the units) 		
п	5	 Epidemiology Risk factors: hereditary, psycho social factors, hypertension, smoking, obesity, diabetes mellitusetc Health promotion, disease prevention, Life stylemodification National health programs related to cardio vascular and thoracic conditions Alternate system of medicine Complementary therapies 		
ш	5	 Review of anatomy and physiology of cardio vascular and respiratory system Review of anatomy and physiology of heart, lung, thoraciccavity and blood vessels. Embryology of heart and lung. Coronary circulation Hemodynamics and electro physiologyof heart. Bio-chemistry of blood in relation to cardio pulmonary function. 		
IV	20	 Assessment and Diagnostic Measures: History taking Physical assessment Heart rate variability: Mechanisms , measurements, pattern, factors, impact of interventions on HRV Diagnostic tests Hemodynamic monitoring: Technical aspects, monitoring, functional hemodynamic indices, ventricular function indices, 		

Unit	Hours	Content
		output measurements (Arterial and swan Ganz monitoring).
		Blood gases and its significance, oxygen supply and demand
		Radiologic examination of the chest: interpretation, chest film findings
		• Electro cardiography(ECG) : electrical conduction through the heart, basic electrocardiography, 12 lead electrocardiogram, axis determination
		 ECG changes in: intraventricular conduction abnormalities- Arrhythmias, ischemia, injury and infarction, atrial and ventricular enlargement, electrolyte imbalance,
		• Echocardiography: technical aspects, special techniques, echocardiography of cardiac structures in health and disease, newer techniques
		• Nuclear and other imaging studies of the heart: Magnetic Resonance Imaging.
		 Cardio electrophysiology procedures: diagnostic studies, interventional and catheter ablation, nursing care
		 Exercise testing: indications and objectives, safety and personnel, pretest considerations, selection, interpretation, test termination, recovery period Cardiac catheterization: indications, contraindications, patient preparation, procedure, interpretation of data
		Pulmonary function test: Bronchoscopy and graphies
		Interpretation of diagnostic measures
		Nurse's role in diagnostic tests
		 Laboratory tests using blood: Blood specimen collection, Cardiac markers, Blood lipids, Hematologic studies, Blood cultures, Coagulation studies, Arterial blood gases, Blood Chemistries, cardiac enzyme studies, Serum Concentration of Selected drugs. Interpretation and role of nurse
		HAL
		 Cardiac disorders and nursing management: Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing managementof: Hypertension Coronary Artery Disease.
		Angina of various types.
		• Cardiomegaly
	\sim	 Myocardial Infarction, Congestive cardiac failure
V	25	Heart Failure, Pulmonary Edema, Shock.
	23	Rheumatic heart disease and other Valvular Diseases
		• Inflammatory Heart Diseases, Infective Endocarditis,
		Myocarditis, Pericarditis.
		Cardiomyopathy, dilated, restrictive, hypertrophic.Arrhythmias, heart block
		Associated illnesses

Unit	Hours	Content		
		Altered pulmonary conditions		
VI	10	 Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing managementof: Bronchitis Bronchial asthma Bronchiectasis Pneumonias Lung abscess, lung tumour Pulmonary tuberculosis, fibrosis, pneumoconiosis etc Pleuritis, effusion Pneumo, haemo and pyothorax Interstitial Lung Disease Cystic fibrosis Acute and Chronic obstructive pulmonary disease (conditions leading to) Cor pulmonale Acute respiratory failure Adult respiratory distress syndrome Pulmonary Hypertension 		
		0°		
VII	10	 Vascular disorders and nursing management Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing managementof: Disorders of arteries Disorders of the aorta Aortic Aneurysms, Aortic dissection Raynaud's phenomenon Peripheral arterial disease of the lowerextremities Venous thrombosis Varicose veins Chronic venous insufficiency and venous legulcers Pulmonary embolism 		
VIII	10	 Cardio thoracic emergency interventions CPR- BLS and ALS Use of ventilator, defibrillator, pacemaker Post resuscitation care. Care of the critically ill patients Psychosocial and spiritual aspects of care Stress management; ICUpsychosis Role of nurse 		
IX	10	Nursing care of a patient with obstructive airway Assessment Use of artificial airway Endotracheal intubation, tracheostomy and its care Complication, minimum cuff leak, securing tubes Oxygen delivery systems. Nasal Cannula		

Unit	Hours	Content	
		Oxygen mask, Venturi mask	
		 Partial rebreathing bag 	
		□ Bi-PAP and C-PAP masks	
		 Uses, advantages, disadvantages, nursing implications of each. 	
		Mechanical Ventilation	
		Principles of mechanical ventilation	
		 Types of mechanical ventilation and ventilators. 	
		□ Modes of ventilation, advantage, disadvantage, complications.	
		□ PEEP therapy, indications, physiology, and complications. Weaning off the	
		ventilator.	
		Nursing assessment and interventions of ventilated patient.	
		Congenital Heart Diseases,	
		□ Etiology, clinical manifestations, diagnois, prognosis, related pathophysiology,	
		treatment modalities and nursing managementof:	
		Embryological development of heart.	
		 Classification – cyanotic and acyanotic heart disease. 	
		Tetralogy of Fallots.	
		 Atrial Septal Defect, Ventricular Septal Defect., Eisenmenger's complex. 	
		Patent ductus arteriosus, AP window	
X	10	Truncus Arteriosus.	
Λ	10	Transposition of great arteries.	
		 Total Anomaly of Pulmonary Venous Connection. 	
		Pulmonary stenosis, atresia.	
		Coarctation of aorta.	
		• Ebstein's anomaly	
		 Double outlet right ventricle, Single ventricle, Hypoplastic left heart 	
		syndrome.	
		Pharmacology	
		Pharmacology	
		 Pharmacokinetics 	
		 Analgesics/Anti inflammatory agents 	
		 Antibiotics, antiseptics 	
		 Drug reaction & toxicity 	
		Drugs used in cardiac emergencies	
		□ Blood and blood components	
	4	Antithrombolytic agents	
		Inotropic agents	
XI	10	Beta-blocking agents	
ΛΙ		Calcium channel blockers.	
		Vaso constrictors	
		Vaso dilators	
		ACE inhibitors.	
		Anticoagulents	
		• Antiarrhythmic drugs.	
		Anti hypertensives	
		• Diuretics	
		• Sedatives and tranquilizers.	
		• Digitalis.	

Unit	Hours	Content		
		Antilipemics		
		 Principles of drug administration, role and responsibilities of nurses and care of drugs 		
		Nursing Care of patient undergoing cardio thoracic surgery		
XII	20	 Nursing Care of patient undergoing cardio thoracic surgery Indications, selection of patient Preoperative assessment and preparation; counselling. Intraoperative care: Principles of open heart surgery, equipment, anaesthesia, cardiopulmonary by pass. Surgical procedures for Coronary Artery Bypass Grafting, recent advances and types of grafts, Valve replacement or reconstruction, cardiac transplant, Palliative surgery and different Stents, vascular surgery, other recent advances. Thoracic surgery: lobectomy, pneumonectomy, tumour excisionetc Immediate postoperative care : assessment, post operative problems and interventions : Bleeding, Cardiac tamponade, Low cardiac output, Infarction, Pericardial effusion, Pleural effusion, Pneumothorax, Haemothorax, Coagulopathy, Thermal imbalance, Inadequate., ventilation/perfusion, Neurological problems, renal problems, Psychological problems. Chest physiotherapy Nursing interventions- life style modification, complementary therapy/alternative systems of medicine. Intermediate and late post operative care after CABG, valve surgery, others. 		
хш	5	Cardiac rehabilitation Process Physical evaluation Life style modification Physical conditioning for cardiovascular efficiency through exercise Counseling Follow up care		
XIV	5	Intensive Coronary Care Unit/intensive cardio thoracic unit: Quality assurance • Standards, Protocols, Policies, Procedures • Infection control; Standard safety measures • Nursing audit • Design of ICCU/ICTU • Staffing; cardiac team • Burn out syndrome • Nurse's role in the management of I.C.C.U and ICTU. • Mobile coronary care unit. • Planning inservice educational programme and teaching

	Total	32 Weeks	960 Hours

Essential Nursing Skills

Procedures Observed

- 1. Echo cardiogram
- 2. Ultrasound
- 3. Monitoring JVP , CVP
- 4. CT SCAN
- 5. MRI
- 6. Pet SCAN
- 7. Angiography
- 8. Cardiac cathetrisation
- 9. Angioplasty
- 10. Various Surgeries
- 11. Any other

I. Procedures Assisted

- 1. Arterial blood gas analysis
- 2. Thoracentesis
- 3. Lung biopsy
- 4. Computer assisted tomography (CAT Scan)
- 5. M.R.I.
- 6. Pulmonary angiography
- 7. Bronchoscopy
- 8. Pulmonary function test
- 9. ET tube insertion
- 10. Tracheostomy tube insertion
- 11. Cardiac catheterisation
- 12. Angiogram
- 13. Defibrillation
- 14. Treadmill test

- 15. Echo cardiography
- 16. Doppler ultrasound
- 17. Cardiac surgery
- 18. Insertion of chest tube
- 19. CVP Monitoring
- 20. Measuring pulmonary artery pressure by Swan-Ganz Catheter
- 21. Cardiac Pacing

II. Procedures Performed

- 1. Preparation of assessment tool for CT client (Cardiac, thoracic and vascular).
- 2. ECG Recording, Reading, Identification of abnormalities
- 3. Oxygen therapy Cylinder, central supply,

Catheter, nasal canula, mask, tent Through ET and Tracheostomy tube Manual

- resuscitation bag
- 4. Mechanical ventilation
- 5. Spirometer
- 6. Tuberculen skin test
- 7. Aerosal therapy
- 8. Nebulizer therapy
- 9. Water seal drainage
- Chest physiotheray including Breathing Exercises Coughing Exercises Percussion & Vibration
- 11. Suctioning Oropharyngeal, nasotracheal, Endotrachieal Through tracheostomy tube
- 12. Artificial airway cuff maintenance
- 13. CPR
- 14. Care of client on ventilator
- 15. Identification of different Arrhythmias Abnormal pulses, respirations
 B.P. Variation Heart sounds

Breath sounds

- 16. Pulse oxymetry
- 17. Introduction of intracath
- 18. Bolus I.V. Injection
- 19. Life line
- 20. Maintenance of "Heplock"
- 21. Subcutaneous of Heparin
- 22. Obtaining leg measurements to detect early swellingin thrombophlebetes
- 23. Identification of Homans signs
- 24. Buergen Allenexercises

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING - CRITICAL CARE NURSING

Placement: II Year

Hours of instruction Theory: 150 hours Practical: 950 hours Total : 1100hours

Course Description

This course is designed to assist students in developing expertise and in- depth knowledge in the field of Critical care Nursing. It will help students to develop advanced skills for nursing intervention in caring for critically ill patients. It will enable the student to function as critical care nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of Critical Care Nursing.

Objectives

At the end of the course the students will be able to

- 1. Appreciate trends and issues related to Critical Care Nursing.
- 2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of critically ill patients
- 3. Describe the various drugs used in critical care and nurses responsibility
- 4. Perform physical, psychosocial & spiritual assessment
- 5. Demonstrate advance skills/competence in managing critically ill patients including Advance Cardiac Life Support.
- 6. Demonstrate skill in handling various equipments/gadgets used for critical care
- 7. Provide comprehensive care to critically illpatients.
- 8. Appreciate team work & coordinate activities related to patient care.
- 9. Practice infection control measures.
- 10. Assess and manage pain .
- 11. Identify complications & take appropriate measures.
- 12. Discuss the legal and ethical issues in critical care nursing
- 13. Assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
- 14. Assist in various diagnostic, therapeutic and surgical procedures
- 15. Incorporate evidence based nursing practice and identify the areas of research in the field of critical care nursing

- 16. Identify the sources of stress and manage burnout syndrome among health care providers.
- 17. Teach and supervise nurses and allied health workers.
- 18. Design a layout of ICU and develop standards for critical care nursing practice.

Course Content

Unit	Hours	Content	
Ι	5	 Introduction to Critical Care Nursing Historical review- Progressive patient care(PPC) Review of anatomy and physiology of vital organs, fluid and electrolyte balance Concepts of critical care nursing Principles of critical care nursing Scope of critical care nursing Critical care unit set up including equipments supplies, useand care of various type of monitors &ventilators Flow sheets 	
II	10	 Concept of Holistic care applied to critical care nursing practice Impact of critical care environment on patients:- Risk factors, Assessment of patients, Critical care psychosis, prevention & nursing care for patients affected with psychophysiological & psychosocial problems of critical care unit, Caring for the patient's family, family teaching The dynamics of healing in critical care unit:-therapeutic touch, Relaxation, Music therapy, Guided Imagery, acupressure Stress and burnout syndrome among health team members 	
Ш	14	Review Pharmacokinetics Analgesics/Anti inflammatory agents Antibiotics, antiseptics Drug reaction & toxicity Drugs used in critical care unit (inclusive of ionotropic, life saving drugs) Drugs used in various body systems IV fluids and electrolytes Blood and blood components Principles of drug administration, role of nurses and care of drugs	
IV	5	 Pain Management Pain & Sedation in Critically ill patients Theories of pain, Types of pain, Pain assessment, Systemic responses to pain pain management-pharmacological and non-pharmacological measures Placebo effect 	

Unit	Hours	Content				
V	5	 Infection control in intensive care unit □ Nosocomial infection in intensive care unit; methyl resistant staphylococcus at (MRSA), Disinfection, Sterilization, Standard safety measures, Prophylaxi staff 				
VI	10	Gastrointestinal System □ Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Gastrointestinal Bleeding, Abdominal injury, Hepatic Disorders:-Fulminent hepatic failure, Hepatic encephalopathy, Acute Pancreatitis, Acute intestinal obstruction, perforative peritonitis				
VII	10	 Renal System Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Renal Failure, Chronic Renal Failure, Acute tubular necrosis, Bladder trauma Management Modalities: Hemodialysis, Peritoneal Dialysis, Continuous Ambulatory Peritoneal Dialysis, Continuous arterio venus hemodialysis, Renal Transplant, 				
VIII	10	 Nervous System Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Common Neurological Disorders:-Cerebrovascular disease, Cerebrovascular accident, Seizure disorders, GuilleinBarre-Syndrome, Myasthenia Gravis, Coma, Persistent vegetative state, Encephalopathy, Head injury, Spinal Cordinjury Management Modalities: Assessment of Intracranial pressure, Management of intracranial hypertension, Craniotomy Problems associated with neurological disorders: Thermo regulation, Unconsciousness, Herniation syndrome 				
IX	5	 Endocrine System Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing Management of :-Hypoglycemia, Diabetic Ketoacidosis, Thyroid crisis, Myxoedema, Adrenal crisis, Syndrome of Inappropriate/ hypersecretion of Antidiuretic Hormone (SIADH) 				
x	15	 Management of other Emergency Conditions Mechanism of injury, Thoracic injuries, Abdominal injuries, pelvic fractures, complications of trauma, Head injuries Shock: Shock syndrome, Hypovolemic, Cardiogenic, Anaphylactic, Neurogenic and Septicshock Systemic inflammatory Response: The inflammatory response, Multiple organ dysfunction syndrome Disseminated Intravascular Coagulation Drug Overdose and Poisoning, Acquired Immunodeficiency Syndrome (AIDS) 				

Unit	Hours	Content			
		 Ophthalmic: Eye injuries, Glaucoma, retinal detachment Ear Nose Throat: Foreign bodies, stridor, bleeding, quincy, acute allergic conditions Psychiatric emergencies;, suicide, crisis intervention 			
XI	20	 Cardiovascular emergencies Principles of Nursing in caring for patient's with Cardiovascular disorders Assessment: Cardiovascular system: Heart sounds, Diagnostic studies:- Cardiac enzymes studies, Electrocardiographic monitoring, Holter monitoring, Stress test. Echo cardiography, Coronary angiography, Nuclear medicinestudies Causes, Pathophysiology, Clinical types, Clinical features, Diagnostic Prognosis, Management : Medical, Surgical & Nurisng managemen of:-Hypertensive crisis, Coronary artery disease, Acute Myocardial infarction, Cardiomyopathy, Deep vein thrombosis, Valvular diseases, Heart block, Cardia arrhythmias & conduction disturbances, Aneurysms, Endocarditis, Heart failur Cardio pulmonary resuscitation BCLS/ ACLS Management Modalities: Thrombolytic therapy, Pacemaker – temporary & permanent, Percutaneous transluminal coronary angioplasty, Cardioversion, Intr Aortic Balloon pump monitoring, Defibrillations, Cardiac surgeries, Coronar Artery Bypass Grafts (CABG/MICAS), Valvular surgeries, Heart Transplantation Autologous blood transfusion, Radiofrequency Catheter Ablation 			
XII	15	 Respiratory System Acid-base balance & imbalance Assesment : History & Physical Examination Diagnostic Tests:Pulse Oximetry, End –Tidal Carbon Dioxide Monitoring, Arterial blood gas studies, chest radiography, pulmonary Angiography, Bronchoscopy, Pulmonary function Test, Ventilation perfusion scan, Lung ventilation scan Causes Pathophysiology, Clinical types, Clinical features, Prognosis, Management: Medical, Surgical and Nursing management of Common pulmonary disorders:-Pneumonia, Status asthmaticus, interstitial drug disease, Pleural effusion, Chronic obstructive pulmonary disease, Pulmonary tuberculosis, Pulmonary edema, Atelectasis, Pulmonary embolism, Acute respiratory failure, Acute respiratory distress syndrome (ARDS), Chest Trauma Haemothorax, Pneumothorax Management Modalities:-Airway Management Ventilatory Management:-Invasive, non- invasive, long term mechanical ventilations Bronchial Hygiene:-Nebulization, deep breathing exercise, chest physiotherapy, postural drainage, Inter Costal Drainage, Thoracic surgeries 			

Unit	Hours	Content			
XIII	7	 Burns Clinical types, classification, pathophysiology, clinical features, assessment, diagnosis, prognosis, Management: Medical, Surgical & Nursing management of burns Fluid and electrolyte therapy – calculation of fluids and its administration Pain management Wound care Infection control Prevention and management of burncomplications Grafts and flaps Reconstructive surgery Rehabilitation 			
XIV	5	 Obstetrical Emergencies Causes, Pathophysiology, Clinical types, clinical features, diagnostic Prognosis, Management: Medical, Surgical and Nursing management of :Antepartum haemorrhage, Preeclampsia, eclampsia, Obstructed labour and ruptured uterus, Post partum haemorrhage, Peurperal sepsis, Obstetricalshock 			
XV	10	 Neonatal Paediatric emergencies Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of Neonatal emergencies Asphyxia Neonatarum, Pathological Jaundice in Neonates, Neonatal seizures Metabolic disorders, Intra cranial Hemorrhage, Neonatal Sepsis, RDS/HMD (Respiratory Distress Syndrome/Hyaline Membrane Disease), Congenita disorders:- Cyanotic heart disease, tracheo oesophageal fistula, congenital hypertropic pyloric stenosis, imperforateanus Pediatric emergencies Dehydration, Acute broncho pneumonia, Acute respiratory distress syndrome Poisoning, Foreign bodies, seizures, traumas, Status asthmaticus 			
XVI	2	 Legal and ethical issues in critical care-Nurse's role Brain death Organ donation & Counselling Do Not Resuscitate(DNR) Euthanasia Living will 			
XVII	2	Quality assurance Standards, Protocols, Policies, Procedures Infection control; Standard safety measures Nursing audit Staffing Design of ICU/CCU			

Total = 960 Hours 1 Week = 30 Hours

FRSI

S.No.	Deptt./Unit	No. of Week	Total Hours
3	Burns ICU	2	60 Hours
5	Medical ICU	8	240 Hours
6	Surgical ICU	12	360 Hours
9	CCU	2	60 Hours
10	Emergency Department	3	90 Hours
12	Dialysis Unit	1	30 Hours
13	Transplant Room	2	60 Hours
14	Paediatric/ NICU	2	60 Hours
	Total	32 Weeks	960 Hours
		-	

ESSENTIAL CRITICAL CARE NURSING SKILLS

I. Procedures Observed

- 1. CT Scan
- 2. MRI
- 3. EEG
- 4. Hemodialysis
- 5. Endoscopic Retrograde cholangio Pancreaticogram(ERCP)
- 6. Heart/ Neuro/GI./ Renal Surgeries

II. Procedures Assisted

- 1. Advanced life support system
- 2. Basic cardiac life support
- 3. Arterial line/arterial pressure monitoring/bloodtaking
- 4. Arterial blood gas
- 5. ECG recording
- 6. Blood transfusion
- 7. IV cannulation therapy
- 8. Arterial Catheterization
- 9. Chest tube insertion
- 10. Endotracheal intubations
- 11. Ventilation

- 12. Insertion of central line/cvp line
- 13. Connecting lines fordialysis

III. Procedure Performed

- 1. Airway management
 - a. Application of oropharyngeal airway
 - b. Oxygen therapy
 - c. CPAP (Continuous Positive Airway pressure)
 - d. Care of tracheostomy
 - e. Endotracheal extubation
- 2. Cardiopulmonary resuscitation, Basic cardiac life support, ECG
- **3.** Monitoring of critically ill patients clinically with monitors, capillary refill time (CRT) assessment of jaundice, ECG.
- 4. Gastric lavage
- 5. Assessment of critically ill patients

Identification & assessment of risk factors, Glasgow coma scale, and dolls eye movement, arterial pressure monitoring, cardiac output/pulmonary artery pressure monitoring, and detection of life threatening abnormalities

- 6. Admission & discharge of critically ill patients
- 7. Nutritional needs gastrostomy feeds, pharyngeal feeds, jejunostomy feeds, TPN, formula preparation & patient education.
- 8. Assessment of patient for alteration in blood sugar levels monitoring blood sugar levels periodically & administering insulinperiodically.
- 9. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, use of insulin syringes/ tuberculin, monitoring fluid therapy, blood administration.
- 10. Setting up dialysis machine and starting, monitoring and closing dialysis
- 11. Procedures for prevention of infections:

Hand washing, disinfection & sterilization surveillance, and fumigation universal precautions.

- 12. Collection of specimen.
- 13. Setting, use & maintenance of basic equipment, ventilator, O2 analyzer, monitoring equipment, transducers, defibrillator, infusion & syringe pumps, centrifuge machine.

IV Other Procedures:

CLINICAL SPECIALITY-II

MEDICAL SURGICAL NURSING- ONCOLOGY NURSING

Placement: II Year

Hours of Instruction Theory :150 hours Practicals : 950 hours Total : 1100 hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of oncology Nursing. It will help students to develop advanced skills for nursing intervention in various oncological conditions. It will enable the student to function as oncology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of oncology nursing

Objectives

- 1. Explain the prevention, screening and early detection of cancer
- 2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of oncological disorders of various body systems
- 3. Describe the psychosocial effects of cancer on patients and families.
- 4. Demonstrate skill in administering/assisting in various treatment modalities used for patients with cancer
- 5. Apply nursing process in providing holistic care to patients with cancer.
- 6. Apply specific concepts of pain management
- 7. Appreciate the care of death and dying patients and value of bereavement support.
- 8. Describe the philosophy, concept and various dimensions of palliative care
- 9. Appreciate the role of alternative systems of medicine in care of cancer patients
- 10. Appreciate the legal & ethical issues relevant to oncologynursing
- 11. Recognize and manage Oncologicalemergencies
- 12. Counsel the patients with cancer and theirfamilies
- 13. Incorporate evidence based nursing practice and identify the areas of research in the field of oncologynursing
- 14. Recognize the role of oncology nurse practitioner as a member of oncology team
- **15.** Collaborate with other agencies and utilize resources in caring for cancer patients.
- 16. Teach and supervise nurses and allied health workers. Design a layout and develop standards for management ofoncology units/hospitals and nursing care.

Content outline

Unit	Hours.	Content
Ι	4	 Introduction Epidemiology-Incidence, Prevalence – Global, National, State and Local Disease burden, concept of cancer, risk factors Historical perspectives Trends and issues Principles of cancer management Roles and responsibilities of oncology nurse
II	5	 The Nature of Cancer Normal cell biology The Immune system Pathological and pathophysiological changes intissues Biology of the cancer cell Clone formation Transformation Tumor stem lines Structure of a solid tumor Products produced by the tumor Systemic effects of tumor growth
III	4	 Etiology of Cancer Carcinogenesis, Theories of cancer causation Risk factors Carcinogens – genetic factors, chemical carcinogens, radiation, viruses, Immune system failure, rapid tissue proliferation Hormone changes, diet, emotional factors.
IV	10	 Diagnostic Evaluation Health assessment: History taking, physical examination, Staging and grading of tumors, TNM Classification Common diagnostic tests Blood investigation: Haemetological, Bio-chemical, Tumor markers, Hormonal assay Cytology:Fine needle aspirationcytology(FNAC) Histopathology: Biopsy Radiological assessment: MRI, Ultrasound, Computed tomography, Mammography, Positron emission tomography(PET), Radio nuclide imaging, Functional metabolism imaging Endoscopies

Unit	Hours.	Content		
V	10	 Levels of prevention and care Primary prevention – Guidelines for cancer detection,general measures, Warning signs of cancer, Self examination-Oral, Breast, Testicular Secondary prevention – early diagnosis. Screening Tertiary prevention – disability limitation, Rehabilitation :Mobility , Speech, Bowel and bladder, Ostomies etc Patient and family education, Discharge instruction, follow-up care and use of community resources. 		
VI	25	 Cancer Treatment Modalities and Nurse's Role Surgery Principles of surgical oncology Current surgical strategy, Determining surgical risk Special surgical techniques Pre-intra-postoperative nursing care Acute and chronic surgical complications Future directions and advances Chemotherapy Principles and classification of chemotherapeutics Pharmacology of antineoplastic drügs- Mechanism of action, Absorption, protein binding, Bio-transformation, excretion, common side effects, drug toxicity Calculating drug doses, Therapeutic response to chemotherapy-Tumor variables, drug resistance, Safety precautions Radiation Therapy Physics of radiotherapy Types of ionizing rays Radiation equipments:Linear accelerator, cobalt, implants, lsotopes, Types of radiation on the body tissue, Radiation biology – cell damage hypoxic cells, alteration of tumor kinetics. Approaches to radiation therapy – External radiotherapy – unscaled, Sealed sources. Effectiveness of radiotherapy-Radiosensitivity, treatment effects Complications of radiotherapy Radiation safety: Standards of Bhaba Atomic Research Centre(BARC) 		

Unit	Hours.	Content		
	 Bone Marrow Transplantation /Stem CellTransplantation Types, indications, transplantation procedure, complication managment Types and donor sources 			
		 Preparation and care of donor and recipient Bone marrow bank Legal and ethical issues 		
		 Immunotherapy (Biotherapy) Concepts and principles Classification of agents Treatment and applications 		
		 <i>Gene Therapy</i> Current Concepts and practices 		
		 <i>Alternative and Complementary Therapies</i> Current practices 		
VII	10	 Pain management:- Theories, typesand Nature of cancer pain Pathophysiology of pain Pain threshold Assessment of pain Principles of cancer pain control Pharmacological: Opioid and non-opioid analgesictherapy Patient controlled analgesia(PCA) Other invasive techniques of pain control Recentdevelopments in Cancer pain Non- Pharmacological pain relief technique- Complementary therapies(Music, massage, meditation, relaxation techniques, biofeed backetc) Psychological intervention in pain control Alternative system of medicines Role of nurse 		
VIII	5	Palliative care Definition and scope, philosophy Concept and elements of palliative care Global and Indian perspective of palliative care Quality of life issues Communication skill Nursing perspective of palliative care and its elements Home care Hospice care Role of nurse in palliative care		

Unit	Hours.	Content			
IX	2	 Infection control: Process of infection, risk of hospitalization, nosocomial infections- prevention and control of infection in acute, long term care facility and community based care Standard safety measures 			
X	30	Nursing Care of Patients With Specific MalignantDisorders Malignancies of G.I. system-oral, oesophagus, stomach, rectal, liver & pancreas, care of ostomies/stoma Respiratory malignancies Genito urinary system malignancies- prostate Bladder, renal testicular malignancies, Gynecological malignancies-cervix, uterus, ovary Hematological malignancies-Lymphomas, Leukemias. Malignancies of musculoskeletal system Endocrine malignancies Skin Head and Neck -brain tumors Other malignancies – Breast cancer, AIDS related Malignancies (Kaposi's Sarcoma)			
XI	10	Paediatric malignancies □ Leukemia,Lymphoma, Neuro- blastoma □ Wilm's tumor, Soft tissue sarcoma, Retinoblastoma □ Nursing Management of childrenwith Paediatric Malignancies			
XII	15	Nursing Management of Physiological Conditions and Symptoms Of Cancer Patient Nutrition: - effects of cancer on nutritional Status and its consequences:-Anemia, Cachexia, Xerostomia, mucositis, Dysphagia , nausea and vomiting, constipation, diarrhoea, electrolyte imbalances, taste alterations Impaired mobility: Decubitus ulcer, pathologic fractures, thrombophlebitis, pulmonary embolism, contractures, footdrop Other symptoms Dyspepsia & hiccup, dyspnoea intestinal obstruction, Fungating wounds Anxiety & depression, insomnia Lymph edema Impact of cancer on sexuality: Effects of radiotherapy/ chemotherapy/surgery on sexuality of the cancer patient Nursing management of cancer patients experiencingsexual dysfunction			

Unit	Hours.	Content		
XIII	10	Cancer Emergencies Disseminated intravascular coagulation(DIC), Malignant pleural effusion Neoplastic cardiac tamponade and septic shock spinal cord compression Superior venacava syndrome Metabolic emergency: hyper and hypo calcemia Surgical emergency Urological emergency Hemorrhage Organ obstruction Brain metastasis Nurses role in managing oncologic emergencies		
XIV	8	Psycho-Social Aspects of Nursing Care Psychological responses of patients with cancer Psychosocial assessment – Crisis intervention, coping mechanisms Stress management, spiritual/cultural care and needs Counseling: individual and family Maximizing quality of life of patient and family Ethical, moral and legal issues- End of life care Grief and grieving process Bereavement support Care of Nurses who care for the dying.		
XV	2	Layout and Design of an oncology institution/ ward, OPD, chemotherapy unit, Bone marrow transplantation unit, Pain clinic etc Practice Standards of oncology nursing Policies and Procedures Establishing Standing orders and Protocols Quality Assurance Programme in oncology units Nursing audit		
	AL			

Clinical Experience

S. No.	Deptt./ Unit	No. of Week	Total Hours
1	Medical Oncology ward	6	180 Hours
2	Surgical Oncology ward	6	180 Hours
3	Bone marrow transplantation Unit	2	60 Hours
4	Operation Theatre	2	60 Hours
5	Radiotherapy Unit	2	60 Hours
6	Chemotherapy Unit	4	120 Hours
7	Out patient department and pain clinic	2	60 Hours
8	Pediatric Oncology ward	2	60 Hours
9	Palliative Careward	2	60 Hours
10	Community oncology	2	60 Hours
11	Hospice	1	30 Hours
12	Other field visits	1	30 Hours
	Total	32 Weeks	960 Hours

Procedures Observed

- 1. CT Scan
- 2. MRI
- 3. PET Scan(Positron Emission Tomography)
- 4. Ultra sound
- 5. Mammography
- 6. Radio Nuclide Imaging
- 7. Bone Scan
- 8. Thyroid Function Test
- 9. Functional and Metabolic Imaging
- 10. Transportation of radioactive materials
- 11. Others

Procedures Assisted

- 1. IV cannulation Open method
- 2. Chemotherapy
- 3. Radiotherapy Brachytherapy Low Density Radiation, High Density Radiation.
- 4. Interstitial implantation
- 5. Bio-therapy and Gene therapy
- 6. Teletherapy Treatment planning
- 7. Bone marrow aspiration and biopsy
- 8. Biopsy tissue
- 9. FNAC Fine Needle Aspiration Cytology andbiopsy

- 10. Advance Cardiac life support
- 11. Endotracheal intubation
- 12. Defibrillation Ventilation
- 13. Tracheostomy
- 14. Thoracentesis
- 15. Paracentesis
- 16. Lumbar Puncture
- 17. Arterial Blood Gas
- 18. Nerve Block
- 19. Chest tube insertion
- 20. Intercostal drainage
- 21. CVP monitoring

Procedure Performed

- 1. Screening forcancer
- 2. Assessment of pain
- 3. Assessment of Nutritionsl status
- 4. Care of Tracheostomy
- 5. Endotracheal intubation
- 6. Gastric gavage
- 7. Pap smear
- 8. IV cannulation
- 9. Care of surgical flaps
- 10. Care of ostomies
- 11. Blood transfusion and component therapy
- 12. Counseling
- 13. Practice standard safety measures
- 14. Care of dead body and mortuary formalities

Other procedures

(As per the institutional protocol):

1. Alternative therapies

and R

CLINICAL SPECIALITY - II

MEDICAL SURGICAL NURSING- NEUROSCIENCES NURSING

Placement : II Years

Hours of Instruction Theory – 150 Hours Practical- 950 Hours Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and in- depth knowledge in the field of neurology and neurosurgical Nursing. It will help students to develop advanced skills for nursing intervention in caring for patients with neurological and neurosurgical disorders. It will enable the student to function as neuroscience nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of neurology and neurosurgical Nursing.

Objectives

At the end of the course the students will be able to

- 1. Appreciate trends and issues related to neurology and neurosurgical Nursing.
- 2. Review the anatomy and physiology of nervous system
- **3.** Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of patients with neurological and neurosurgicaldisorders
- 4. Perform neurological assessment and assist in diagnostic procedures
- 5. Describe the concepts and principles of neurosciencenursing
- 6. Describe the various drugs used in neurosciences and nurses responsibility
- 7. Assist in various therapeutic and surgical procedures in neuroscience nursing
- 8. Demonstrate advance skills/competence in managing patients with neurological and neurosurgical disorder following nursing process approach
- 9. Identify psychosocial problems of patients with disabilities and assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
- 10. Participate in preventive, promotive and rehabilitative services for neurological and neurosurgical patients.
- 11. Explain the legal and ethical issues related to brain death, organ transplantation and practice of neuroscience nursing
- 12. Incorporate evidence based nursing practice and identify the areas of research in the field of neuroscience nursing

- 13. Organise and conduct in service education program for nursing personnel.
- 14. Develop standards of care for quality assurance in neuroscience nursing practice
- 15. Identify the sources of stress and manage burnout syndrome among health care providers.
- 16. Teach and supervise nurses and allied health workers.
- 17. Plan and develop physical layout of neuro intensive care unit

Unit	Hours	Content		
Ι	5	 Introduction Introduction to neuroscience(neurological and neurosurgical) nursing History-Development in neurological and neurosurgical nursing, Service & education Emerging trends and issues in neurology and neuro surgery and its implication to nursing. neurological and neurosurgical problems- Concepts, principles and nursingperspectives Ethical and legal issues Evidence based nursing and its application in neurological and neurosurgical nursing 		
II	5	 Epidemiology Major health problems- Risk factors associated with neurological conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations, occupational and infections. Health promotion, disease prevention, life style modification and its implications to nursing Alternate system of medicine/complementary therapies 		
Ш	10	 Review of Anatomy and physiology Embryology Structure and functions of Nervous system- CNS, ANS, cereberal circulation, cranial and spinal nerves and reflexes, motor and sensory functions Sensory organs 		

Unit	Hours	Content
IV	15	 Assessment and diagnostic measures Assessment History taking Physical assessment, psychosocial assessment Neurological assessments, Glasgow coma scale interpretation & its relevance to nursing. Common assessment abnormalities Diagnostic measures Cerebro spinal fluid analysis Radiological studies-Skull and spine X-ray Cerebral Angiography, CT Scan, Single Photon Emission Computer Tomography(SPECT), MRI (Magnetic Resonance Imaging), MRA, MRS, Functional MRI, Myelography, PET (Positron Emission Test), Interventional radiology. Electorgraphic studies-Electro encephalo graphy, MEG,EMG, video EEG, Nerve conduction studies-Evoked potentials, visual evoked potentials, brain stem auditory evoked potentials, somatosensory evoked potentials. Ultrasound studies-Carotid duplex, transcranial Doppler sonography, Immunological studies Biopsies – muscle, nerve and Brain. Interpretation of diagnostic measures Nurse's role in diagnostic tests
V	5	 Meeting Nutritional needs of neurological patients Basic nutritional requirements Metabolic changes following injuryand starvation Nutritional assessment Common neurological problems that interfere with nutritionand strategies for meeting their nutritional needs Special metabolic and electrolyte imbalances Chronic fatigue syndrome
VI	5	 Drugs used in neurological and neurosurgical disorders Classification Indications, contraindications, actions and effects, toxic effects Role of nurse

Unit	Hours	Content			
VII	10	 Traumatic conditions. Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: medical, surgical and Nursing management of Cranio cerebral injuries. Spinal & Spinal cord injuries. Peripheral nerve injuries. Unconsciousness 			
VIII	10	 Cerebro vascular disorders. Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: medical, surgical and Nursing management of Stroke & arterio venous thrombosis. Haemorrhagic embolus. Cerebro vascular accidents. Intracranial aneurysm. Subarchnoid Haemorrhage. Arterio venous fistula. Brain tumours Diseases of cranial nerves; Trigiminal neuralgia, Facial palsy, Bulbar palsy. 			
IX	10	 Degenerating and demyelinating disorders Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of Motor neuron diseases. Movement disorders- Tics, dystonia, chorea, wilson's disease, essential tremors Dementia. Parkinson's disease. Multiple sclerosis. Alzemier's 			
x	10	 Neuro infections Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of Neuro infections Meningitis-types Encephalitis. Poliomyelitis. Parasitic infections. Bacterial infections Neurosyphilis. HIV & AIDS. Brain abscess. 			

Unit	Hours	Content			
XI	10	 Paroxysmal disorders. Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: medical, surgical and Nursing management of Epilepsy and seizures. Status epilepticus. Syncope. Menier's syndrome. Cephalgia. 			
XII	10	 Developmental disorders. Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of Hydrocephalus. Craniosynostosis. spina bifida- Meningocele,Meningomyelocele encephalocele syringomyelia. Cerebro vascular system anomalies. Cerebral palsies. Down's syndrome 			
XIII	10	 Neuro muscular disorders. Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of Polyneuritis – G B Syndrome. Muscular dystrophy. Muscular dystrophy. Myasthenia gravis. Trigeminal neuralgia. Bell's palsy. Menier's disease Carpal tunnel syndrome Peripheral neuropathies 			
XIV	5	 Neoplasms – surgical conditions. Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of Space occupying lesions -types Common tumors of CNS, 			
XV	5	 Other disorders Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of Metabolic disorders- diabetes, insipidus, metabolic encephalopathy Sleep disorders Auto immune disorders- multiple sclerosis, inflammatory myopathies 			

Unit	Hours	Content			
XVI	10	 Neuro emergencies Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of Increased intracranial pressure Unconscious Herniation syndrome Seizures Severe head injuries Spinal injuries Cerebro vascular accidents 			
XVII	5	 Rehabilitation. Concept and Principles of Rehabilitation. Factors affecting quality of life and coping Rehabilitation in acute care setting, and following stroke, head injury and degenerative disorders of brain Physiotherapy. Counselling Care giver's role Speech & LanguageNeurogenic communication disorders, Speech therapy			
XVIII	5	Ethical and legal issues in neuroscience nursing □ Brain death and organ transplantation □ Euthanasia □ Negligence and malpractice □ Nosocomial infections			
XIX	5	 Quality assurance in neurolgical nursing practice Role of advance practitioner in neurological nursing Professional practice standards Quality control in neurologic nursing Nursing audit Neuro ICU Philosophy, aims and objectives Policies, staffing pattern, design and physical plan of neuro ICU Team approach, functions Psychosocial aspects in relation to staff and clients of neuro ICU, In-service education 			

S.No.	AREA OF POSTING	No. of Week	Total Hours
1	O.P.D.	2	60
2	Casualty	2	60
3	Diagnostics	2	60
4	Neuro psychiatry	1	30
5	Neuro Medical wards	4	120
6	Paediatric Neuro ward	2	60
7	Neuro surgical wards	4	120
8	Head Injury ward	3	90
9	ICU- neuro medicine	4	120
10	I.C.U neuro surgical	4	120
11	Rehabilitation	2	60
12	Operation Theatre	2	60
	Total	32 Weeks	960 Hours

ESSENTIAL NEURONURSING SKILLS

I. Procedures Observed

- 1. CT scan
- 2. MRI
- **3**. **P**ET
- 4. EEG
- 5. EMG
- 6. Sleep patternstudies/Therapy
- 7. Radiographical studies
- 8. Neuro surgeries
- 9. Nerve conduction studies
- 10. Ultrasound studies
- 11. Any other

II. Procedures Assisted

- 1. Advanced Cardiac life support
- 2. Lumbar Puncture
- 3. Biopsies muscle, nerve and Brain
- 4. Arterial Blood Gas
- 5. ECG Recording
- 6. Blood transfusion
- 7. IV cannulation open method

- 8. Endotracheal intubation
- 9. Ventilation
- 10. Tracheostomy
- 11. ICP monitoring
- 12. Gama Knife
- 13. Cereberal angiography
- 14. Myelography
- 15. Neuro surgeries

III. Procedures Performed:

- 1. Airway management
 - a. Application of Oro Pharyngeal Airway
 - b. Care of Tracheostomy
 - c. Conduct Endotracheal Intubation
 - d. use of AMBU bag, artificial respirators
 - e. Setting of Ventilators and Care of patientson ventilators
- 2. Cardio Pulmonary Resuscitation Defibrillation
- 3. Neurological assessment -Glasgow coma scale
- 4. Gastric Lavage
- 5. IV Cannulation
- 6. Administration of emergency IV Drugs, fluid
- 7. Care of patients with incontinence, bladder training Catheterization
- 8. Care of patients on traction related to the neurological conditions
- 9. Blood Administration.
- 10. Muscle strengthening exercises
- 11. Guidance and counseling
- 12. Monitoring management and care of monitors.
- **IV.** Other Procedures:

N

CLINICAL SPECIALITY - II

MEDICAL SURGICAL NURSING- NEPHRO-UROLOGY NURSING

Placement : II Year

Hour of Instruction Theory : 150 Hours Practical : 950 Hours Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Nephro and urological Nursing. It will help students to develop advanced skills for nursing intervention in various nephro and urological conditions. It will enable the student to function as nephro and urology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of nephro and urology nursing

Objectives

11.

At the end of the course the students will be able to:

- 1. Appreciate trends and issues related to **nephro and urological** nursing
- 2 Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of **nephro and urological** conditions
- **3** Perform physical, psychosocial & spiritual assessment
- 4 Assist in various diagnostic, therapeutic and surgical interventions
- 5 Provide comprehensive nursing care to patients with **nephro and urological conditions**
- 6 Describe the various drugs used in **nephro and urological** conditions and nurses responsibility
- 7. Demonstrate skill in handling various equipments/gadgets used for patients with **nephro and urological** conditions
- 8 Appreciate team work & coordinate activities related to patient care.
- 9. Practice infection control measures.
- 10. Identify emergencies and complications & take appropriate measures
 - Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
- 12 Discuss the legal and ethical issues in **nephro and urological** nursing
- **13** Identify the sources of stress and manage burnout syndrome among health care providers

- 14 Appreciate the role of alternative system of medicine in the care of patient
- **15** Incorporate evidence based nursing practice and identify the areas of research in the field of **nephro and urological** nursing
- 16 Teach and supervise nurses and allied health workers.
- 17. Design a layout of kidney transplant unit and dialysis unit
- 18 Develop standards of nephro urological nursingpractice

Unit	Hours	Content	
I	5	 Introduction Historical development: trends and issues in the fieldof nephro and urological nursing. nephro and urological problems Concepts, principles and nursingperspectives Ethical and legal issues Evidence based nursing and its application in nephroand urological nursing(to be incorporated in all the units) 	
II	5	 Epidemiology Major health problems- urinary dysfunction, urinary tract infections, Glomuerular disorders, obstructive disorders ad other urinary disorders Risk factors associated with nephro and urological conditions conditions-Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations Health promotion, disease prevention, life style modification and its implications to nursing Alternate system of medicine/complementary therapies 	
ш	5	Review of anatomy and physiology of urinary system Embryology Structure and functions Renal circulation Physiology of urine formation Fluid and electrolyte balance Acid base balance Immunology specific to kidney	
IV	20	 Assessment and diagnostic measures History taking Physical assessment, psychosocial assessment Common assessment abnormalities-dysurea, frequency, enuresis, urgency, hesistancy, hematuria, pain, retention, burning on urination, pneumaturia, incontinence, nocturia, polyurea, anuria, oliguria, Diagnostic tests-urine studies, blood chemistry, radiological procedures-KUB, IVP,nephrotomogram, retrograde pylogram, renal arteriogram, renalultrasound, CT scan, MRI, cystogram, renal 	

Unit	Hours	Content	
		scan, biopsy, endoscopy-cystoscopy, urodynamics studies-	
		cystometrogram, urinary flow study, sphincter electromyography, voiding pressure	
		flow study, videourodynamics, Whitaker study	
		Interpretation of diagnostic measures Nurse's role in

CLINICAL SPECIALITY - II

MEDICAL SURGICAL NURSING - ORTHOPEDIC NURSING

Placement : II Year

Hours of Instruction Theory : 150 Hours Practical : 950 Hours Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of orthopedic nursing. It will help students to develop advanced skills for nursing intervention in various orthopedic conditions. It will enable the student to function as orthopedic nurse practitioner/specialist providing quality care. It will further enable the student to function as educator, manager, and researcher in the field of orthopedic nursing.

Objectives

12.

At the end of the course the students will be able to:

- 1. Appreciate the history and developments in the field of orthopedic nursing
- 2. Identify the psycho-social needs of the patient while providing holistic care.
- 3. Perform physical and psychological assessment of patients with orthopedic conditions and disabilities.
- 4. Describe various disease conditions and their management
- 5. Discuss various diagnostic tests required in orthopedic conditions
- 6. Apply nursing process in providing care to patients with orthopedic conditions and those requiring rehabilitation.
- 7. Recognizeand manage orthopedic emergencies.
- 8. Describe recent technologies and treatment modalities in the management of patients with orthopedic conditions and those requiring rehabilitation.
- 9. Integrate the concept of family centered, long term care and community based rehabilitation to patients with orthopedic conditions.
- 10. Counsel the patients and their families with orthopedic conditions
- 11. Describe various orthotic and prosthetic appliances
 - Appreciate the legal and ethical issues pertaining to patients with orthopedic conditions and those requiringrehabilitation.
- 13. Appreciate the role of alternative system of medicine in care of patients with orthopedic conditions

- 14. Incorporate evidence based nursing practice and identify the areas of research in the field of orthopedicnursing.
- 15. Recognize the role of orthopedic nurse practitioner and as a member of the orthopedic and rehabilitation team.
- 16. Teach orthopedic nursing to undergraduate students and in-service nurses.
- 17. Prepare a design and layout of orthopedic and rehabilitativeunits.

Unit	Hours	Content	
I	5	 Introduction Historical perspectives – History and trends in orthopedicnursing Definition and scope of orthopedic nursing Anatomy and physiology of Musculo-skeletal system Posture, Body landmarks Skeletal system Muscular system. Nervous system - Main nerves Healing of - Injury, bone injury, Repair of ligaments Systemic response to injury Ergonomics, Body mechanics, biomechanical measures Orthopedic team 	
п	8	 Assessment of Orthopedic Patient Health Assessment: History, physical examination-Inspection, palpation, movement, Measurement, muscle strengthTesting. Diagnostic studies – Radiological studies, Muscle enzymes, serologic studies 	
ш	10	 Care of patients with devices Splints, braces, various types of plaster cast Various types of tractions, Various types of orthopedic beds andmattresses Comfort devices Implants in orthopedic Prosthetics and Orthotics 	
IV	15	Injuries Trauma & Injuries Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis, management, medical surgical and nursing management of : Early management of Trauma Fractures Injuries of the Shoulder and arm Elbow, fore arm, wrist, hand Hip, thigh, knee, leg, ankle, foot Spine	

Unit	Hours	Content
		Head injury
		□ Chest injury
		• Polytrauma
		Nerve injuries
		Vascular injuries
		• Soft tissue injuries
		Sports injuries
		Amputation
		Infections of Bones and Joints
		□ Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis,
		management, medical surgical and nursing management of :
		• Tuberculosis
V	8	Osteomyelitis
		• Arthritis
		• Leprosy
		Bone Tumours
		 Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis,
		management, medical surgical andnursing management of:
VI	5	Bone tumors – Benign, Malignant and metastatic
	_	Differenttypes of therapies for tumors
		Deformities
		□ Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis –
		 medical surgical and nursing management of:Scoliosis, Kyphosis,Lordosis Congenital disorders: Congenital dislocation of hip(CDH), Dislocation of patella,
		 Congenital disorders: Congenital dislocation of nip(CDH), Dislocation of patella, knee,
	10	 Varus and valgus deformities,
VII		 Deformities of digits,
,	10	□ Congenital torticollis.
		 Meningocele, meningomyelocele, spina bifida,
		□ Chromosomal disorders.
		Computer related deformities
		Disorders of the spine
		Disorders of the spine Intervertebral disc prolapse, Fracture of the spine
VIII		 Low back disorder – Low back pain, PND, spinal stenosis,
		spondylosis
		Nutritional/Metabolic and Endocrine Disorders
		□ Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis,
	5	medical surgical and nursing management of:
IX		• Rickets,
		Scurvy, Iumor vitominosis A and D
		 Hyper vitaminosis A and D, Osteomalacia
		• Osteomalacia,

Unit	Hours	Content	
		 Osteoporosis Paget's disease, gout, Gigantism, Dwarfism, Acromegaly. Therapeutic diets for various orthopedic disorders 	
X	8	 Neuro-Muscular Disorders: Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis, medical surgical and nursing management of: Poliomyelitis, CerebralPalsy Myasthenia gravis Spina bifida. Peripheral nerve lesion, Paraplegia, Hemiplegia, Quadriplegia. Muscular dystrophy 	
XI	8	Chronic/Degenerative Diseases of Joints andAutoimmune Disorders: Diseases of Joints andAutoimmune □ Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis – medical surgical and nursing management of: • • Osteo Arthritis • • Rheumatoid Arthritis • • Spinal disorders. • • Systemic Lupus Erythematosus	
XII	5	 Orthopedic Disorders in Children: General and special consideration on pediatricorthopedics Genetic disorders Congenital anomalies Growth disorders Genetic counseling Nurses role in genetic counseling 	
XIII	5	 Geriatric Problems Geriatric population, types of disabilities, causes, treatment and Management – Hospitalization, rest, physiotherapy, involvement of family members, social opportunities. Care at home – involvement of family and community, follow up care and rehabilitation 	
XIV	6	 Pharmacokinetics Principles of drug administration Analgesics and anti inflammatory agents Antibiotics, Antiseptics, Drugs used in orthopedics and neuromusculardisorders Blood and blood components Care of drugs and nurses role 	

Unit	Hours	Content
XV	30	Nurses Role in Orthopedic Conditions Gait analysis Urodynamic studies Prevention of physical deformities Alteration of body temperature regulatory system and immune systems Immobilization – cast, splints, braces and tractions Prevention and care of problems related to immobility Altered sleeppatterns Impaired communication Self care and activities of daily living Bladder and bowel rehabilitation Psychological reaction related to disabilities and disorders. Coping of individual and family with disabilities and disorders Maintaining sexuality Spirituality – A rehabilitative prospective Orthopedic Reconstructive Surgeries Replacement surgeries – Hip, Knee, Shoulder Spine surgeries Grafts and flaps surgery Deformity correction. Physiotherapy Concepts, Principles, purpose, Mobilization – Exercises: types, re-education in walking: Crutch walking, wheel chair, Transfer techniques, Types of gaits: Non-weight bearing, partial weight bearing, four point crutch, tripoid, walking with sticks, calipers Forms of therapies; Hydrotherapy, electrotherapy, waxbath, heat therapy, ice, helio therapy, radiant heat, Chest physiotherapy
XVI	8	Rehabilitation Principles of rehabilitation, definition, philosophy, process, Various types of therapies Special therapies and alternative therapies Rehabilitation counseling Preventive and restorative measures. Community based rehabilitation(CBR) Challenges inrehabilitation. Role of the nurse in rehabilitation, Legal and ethical issues in rehabilitationnursing Occupational therapy
XVII	5	 National Policies and Programmes National programmes for rehabilitation of persons with disability - National Institutes, artificial limbs manufacturing Corporation, District Rehabilitation Centers and their schemes Regional rehabilitation centers etc.

Unit	Hours	Content	
		 Public policy in rehabilitation nursing The persons with disabilities act 1995, Mental rehabilitation and Multiple disabilitiesact 1992, The National Trust Rules 1999 and 2000 Rehabilitation Council of India Legal and ethical aspects in orthopedicnursing Rehabilitation health team and different categories of team members. 	
XVIII	4	Quality assurance Standards, Protocols, Policies, Procedures Nursing audit Staffing Design of orthopedic, physiotherapy and rehabilitation unit	

Practicals

- 1. Clinical practice in Orthopedic, physiotherapy and Rehabilitation Units.
- 2. Application of tractions and plaster casts and removal of tractions and plaster casts and other appliances.
- **3.** Apply Theories and Nursing Process in the management of patients with orthopedic conditions.
- 4. Provide various types of physical and rehabilitativetherapies
- 5. Provide health education on related disease conditions
- 6. Unit management and plan designing

MALMANCH

Total = 960 Hours 1 Week = 30 Hours

S. No.	Deptt./Unit	No. of Week	Total Hours

Procedures Observed

- 1. X Ray
- 2. Ultrasound
- 3. MRI
- 4. C T Scan/bone scan
- 5. Arthroscopy
- 6. Electrothermally assisted capsule shift or ETAC (Thermal capsulorrhaphy)
- 7. Fluroscopy
- 8. Electromyography
- 9. Myelography
- 10. Discography
- 11. Others

Procedures Assisted

- 1. Blood Transfusion
- 2. IV cannulation and therapy
- 3. Ventilation
- 4. Various types of tractions
- 5. Orthopedic surgeries Arthrocentesis, Arthroscopy, Bone lengthening, Arthrodesis, grafting, Fractures fixation, reconstructive, reimplantation, replantation, spinal decompression, transplantation of bone, muscle or articular cartilage, autografting, allografting.
- 6. Injection Intra articular, intra osseous.
- 7. Advance LifeSupport

Peocedures Performed

- 1. Interpretation of X ray films.
- 2. Application and removal of splints, casts, and braces.
- 3. Care of tractions skin and skeletal traction, pin site care.
- 4. Cold therapy.
- 5. Heat therapy
- 6. Hydrotherapy
- 7. Therapeutic exercises
- 8. Use of TENS (Transcutaneous electrical nerve stimulation)
- 9. Techniques of transportation
- 10. Crutch walking, walkers, wheel chair.
- 11. Use of devices for activities of daily living and prevention of deformities.
- 12. Administration of drugs: IV injection, IV cannulation, and Blood transfusion.
- 13. Procedures for prevention of infections: disinfection and sterilization, surveillance, fumigation.
- 14. Special skin/ part preparations for orthopedicsurgeries.

MALMANCHAL

- 15. Surgical dressings Debridement.
- 16. Bladder and bowel training

CLINICALSPECIALITY - II

MEDICAL SURGICAL NURSING - GASTRO ENTEROLOGY NURSING

Placement : II Year

Hours of Instruction

Theory : 150 hrs. Practical : 950 hrs. Total : 1100hrs.

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of gastro enterology Nursing. It will help students to develop advanced skills for nursing intervention in various gastro enterology conditions. It will enable the student to function as gastro enterology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of gastro enterology nursing

Objectives

At the end of the course the students will be able to

- 1. Appreciate trends and issues related to gastro enterologynusing
- 2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of gastrointestinal conditions
- **3.** Participate in national health programs for health promotion, prevention and rehabilitation of patients with gastrointestinal conditions
- 4. Perform physical, psychosocial & spiritual assessment
- 5. Assist in various diagnostic, therapeutic and surgical procedures
- 6. Provide comprehensive care to patients with gastrointestinal conditions
- 7. Describe the various drugs used in gastrointestinal conditions and nurses responsibility
- 8. Demonstrate skill in handling various equipments/gadgets used for patients with gastrointestinal conditions
- 9. Appreciate team work & coordinate activities related to patient care.
- 10. Practice infection control measures.
- **11.** Identify emergencies and complications & take appropriate measures
- 12. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
- 13. Discuss the legal and ethical issues in GE nursing

- 14. Identify the sources of stress and manage burnout syndrome among health care providers
- 15. Appreciate the role of alternative system of medicine in care of patient
- 16. Incorporate evidence based nursing practice and identify the areas of research in the field of gastrointestinal nursing
- 17. Teach and supervise nurses and allied health workers.
- 18. Design a layout of Gastro entrology intensive care unit (GEICU), liver care/transplant unit

Unit	Hours	Content	
I	5	 Introduction Historical development: trends and issues in the field of gastro enterology. Gastro enterological problems Concepts, principles and nursingperspectives Ethical and legal issues Evidence based nursing and its application in gastrointestinal nursing(to be incorporated in all the units) 	
II	5	 Epidemiology Risk factors associated with GE conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations Health promotion, disease prevention, life style modification and its implications to nursing National health programmes related to gastro enterology Alternate system of medicine/complementary therapies

8	Pediatric gastroenterology	2	60 Hours
9	Oncology	2	60 Hours
10	GE OPD	2	60 Hours
	Total	32 Weeks	960 Hours

Procedures Assisted

- 1. Endoscopy room Upper G.I. Endoscopy (Diagnotic and therapeutic).
- 2. Sigmoidoscopy
- 3. Colonoscopy
- 4. Polypectomy
- 5. Endoscopic retrograde cholangio pancreatiography (ERCP)
- 6. Liver biopsy
- 7. Percutaneous catheter drainage (PCD) of Pseudocystpancreas
- 8. Abdominal paracentesis
- 9. Percutaneous aspiration of liver abscess
- 10. GE Lab : PT, HbsAg, Markers A, B, C virus, CBP, ESR, Stool Test

Procedures Performed

- 1. History and Physical assessment
- 2. RT intubation / extubation / aspiration/suction
- 3. Gastric lavage and gavage
- 4. Bowel wash
- 5. Therapeutic Diets
- 6. Ostomy feeding
- 7. Stoma care
- 8. Monitoring vital parameters
- 9. Plan of inservice education programme for nursing staff and Class-IV employees
- 10. Counseling

CLINICAL SPECIALITY – II

OBSTETRIC AND GYNAECOLOGICALNURSING

Placement - II Year

Hours of Instruction				
Theory: 150 hrs				
Practical	950 hrs			
Total	1100 hrs			

Course Description

This course is designed to assist the student in developing expertise and in- depth understanding in the field of Obstetric and gynecological Nursing. It will help the student to develop advanced nursing skills for nursing interventions in various obstetrical and gynecological conditions. It will further enable the students to function as midwifery nurse practitioner/ specialist, educator, manager and researcher in the field of obstetric and gynecological nursing.

Objectives

At the end of the course, the student will be able to:

- 1. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of women with obstetric and gynaecological conditions
- 2. Perform physical, psychosocial, cultural & spiritual assessment
- 3. Demonstrate competence in caring for women with obstetrical and gynaecological conditions
- 4. Demonstrate competence in caring for high risknewborn.
- 5. Identify and Manage obstetrical and neonatal emergenciesas per protocol.
- 6. Practice infection control measures
- 7. Utilize recent technology and various diagnostic, therapeutic modalities in the management of obstetrical, gynecological and neonatal care.
- 8. Demonstrate skill in handling various equipments/gadgets used for obstetrical, gynaecological and neonatalcare
- 9. Teach and supervise nurses and allied health workers.
- 10. Design a layout of speciality units of obstetrics and gynecology
- **1**. Develop standards for obstetrical and gynaecological nursingpractice.
- 12. Counsel women and families
- **13.** Incorporate evidence based nursing practice and identify the areas of research in the field of obstetrical and gynaecologicalnursing
- 14. Function as independent midwiferynurse practitioner

Contents Outline

	Unit	Hours	Content
	Ι	25	 Management of problems of women during pregnancy Risk approach of obstetrical nursing care , concept &goals. Screening of high-risk pregnancy, newer modalities of diagnosis. Nursing Managementof Pregnancies at risk-due to obstetrical complication Pernicious Vomiting. Bleeding in early pregnancy, abortion, ectopic pregnancy, and gestational trophoblostic diseases. Hemorrhage during late pregnancy, ante partum hemorrhage, Placenta praevia, abruptioplacenta. Hypertensive disorders in pregnancy, pre-eclampsia, eclampsia, Heomolysis Elevated liver enzyme LowPlatelet count (HELLP) Iso-immune diseases. Rh and ABO incompatibility Heydrannios-oligohydramnios Prolonged pregnancy- post term, post maturity. Multiple pregnancies. Intra uterine infection & pain during pregnancy. Intra Uterine Growth Retardation(IUGR), Premature Rupture of Membrane(PROM), intra uterine death
*	П	15	Pregnancies at risk-due to pre-existing health problems Metabolic conditions. Anemia and nutritional deficiencies Hepatitis Cardio-vascular disease. Thyroid diseases. Epilepsy. Essential hypertension Chronic renal failure. Tropical diseases. Psychiatric disorders Infections Toxoplasmosis Rubella Cytomegalo virus Herpes (TORCH); Reproductive Tract Infection(RTI);STD; HIV/AIDS, Vaginal infections; Leprosy, Tuberculosis Other risk factors: Age- Adolescents, elderly; unwed mothers, sexual abuse, substance use Pregnancies complicating with tumors, uterineanomalies, prolapse, ovarian cyst
	Ш	15	 Abnormal labour, pre-term labour & obstetrical emergencies Etiology, pathopyhsiology and nursing managementof Uncoordinated uterine actions, Atony ofuterus, precipitate labour, prolonged labour. Abnormal lie, presentation, positioncompound presentation.

		 Contracted pelvis-CPD; dystocia. Obstetrical emergencies Obstetrical shock, vasa praevia, inversion of uterus, amniotic fluid embolism, rupture uterus, presentation and prolapse cord. Augmentation of labour. Medical and surgical induction. Version Manual removal of placenta. Obstetrical operation: Forceps delivery, Ventouse, Caesarian section, Destructive operations Genital tract injuries-Third degree perineal tear, VVF,RVF Complications of third stage of labour: Post partum Hemorrhage. Retained placenta. 		
IV	10	 post partum complications Nursing managementof Puerperal infections, puerperal sepsis, urinary complications, puerperal venous thrombosis and pulmonary embolism Sub involution of uterus, Breast conditions, Thrombophlebitis Psychological complications, post partumblues, depression, psychosis 		
v	25	 High Risk Newborn Concept, goals, assessment, principles. Nursing managementof Pre-term, small for gestational age, post-mature infant, and baby of diabetic and substance use mothers. Respiratory conditions, Asphyxia neonatorum, neonatal apnoea meconium aspiration syndrome, pneumo thorax, pneumo mediastinum Icterus neonatorum. Birth injuries. Hypoxic ischaemic encephelopathy Congenital anomalies. Neonatal seizures. Neonatal hypocalcaemia, hypoglycemia, hypomagnesaemia. Neonatal heart diseases. Neonatal hemolytic diseases Neonatal infections, neonatal sepsis, opthalmia neonatorum, cogenital syphilis, HIV/AIDS Advanced neonatal procedures. Calculation of fluid requirements. Hematological conditions – erythroblastosis fetalis, hemorrhagic disorder in the newborn Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU 		

VI	15	HIV/AIDS HIV positive mother and her baby Epidemiology Screening Parent to child transmission(PTCT) Prophylaxis for mother and baby Standard safety measures Counseling Breast feeding issues National policies and guidelines Issues: Legal,ethical, Psychosocial and rehabilitation
VII	25	 Gynecological problems and nursing management Gynecological assessment Gynecological procedures Etiology, pathophysiology, diagnosis andnursing management of Menstrual irregularities Diseases of genital tract Genital tract infections Uterine displacement Genital prolapse Genital injuries Uterine malformation Uterine fibroid, ovarian tumors, Breast carcinoma, Pelvic inflammatory diseases, reproductive tract malignancies, hysterectomy – vaginal and abdominal. Sexual abuse, rape, trauma , assault
VIII	5	Administration and management of obstetrical and gynaecological unit
IX	5	 Education and training in obstetrical and gynaecological care Staff orientation, training and development, In-service educationprogram, Clinical teaching programs.

Total = 960 Hours 1 Week = 30 Hours

S.No.	Deptt./ Unit	No. of Week	Total Hours
1	Antenatal OPD including Infertility clinics/Reproductive medicine, Family welfare and post partum clinic / PTCT	6	180 Hours
2	Antenatal and Postnatal ward	6	180 Hours
3	Labour room	4	120 Hours
4	Neonatal Intensive Care Unit	3	90 Hours
5	Obstetric/Gynae Operation Theatre	3	90 Hours
6	Gynae Ward	4	120 Hours
7	CHC, PHC, SC	6	180 Hours
	Total	32 Weeks	960 Hours

Essential Obstetrical And Gynecological Skills

Procedure Observed

- Assisted Reproductive Technology procedures
- Ultra sonography
- Specific laboratory tests.
- Amniocentesis.
- Cervical & vaginal cytology.
- Fetoscopy.
- Hysteroscopy.
- MRI.
- Surgical diathermy.
- Cryosurgery.

Procedures Assisted

- Operative delivery
- Abnormal deliveries-Forceps application, Ventouse, Breech
- Exchange blood transfusion
- Culdoscopy.
- Cystoscopy
- Tuboscopy
- Laparoscopy.
- Endometrial Biopsy
- Tubal patent test
- Chemotherapy
- Radiation therapy
- Medical Termination of Pregnancy.
- Dilatation and Curettage

Procedures Performed

- History taking.
- Physical Examination-General
- Antenatal assessment. 20
- Pelvic examination
- Assessment of risk status.
- Assessment of Intra uterine foetal well-being.kick chart and foetal movement chart, Doppler assessment, Non Stress Test, Contraction stress test(Oxytocin challenge test)
- Universal precautions- Disposal of biomedical waste.
- Per Vaginal examination and interpretation (early pregnancy, labour, post partum).
- Utilization of Partograph
- Medical & Surgical induction(Artificial rupture of membranes).
- Vacuum extraction
- Conduct of delivery.
- Prescription and administration of fluids and electrolytes through intravenous route.
- Application of outlet forceps, delivery of breach Burns Marshall, Loveset manoeuvere
- Repair of tears and Episiotomy suturing.
- Vacuum extraction
- Controlled cord traction, Manual removal of placenta, placental examination,
- Manual vacuum aspiration
- Postnatal assessment.- 20
- Management of breastengorgement
- Thrombophlebitis (white leg)
- Postnatal counseling.
- Reposition of inversion of uterus.
- Laboratory tests: Blood- Hb, Sugar, Urine-albumin, sugar
- Breast care, breast exam, and drainage breast abscess.
- Postnatal exercise.
- Assessment –New born assessment; physical and neurological, Apgar score, high-risk newborn, Monitoring neonates; Clinically and With monitors, Capillary refill time, Assessment of jaundice, danger signs
- Anthropometric measurement
- Neonatal resuscitation
- Gastric Lavage
- Care of newborn in multi channel monitor andventilator.
- Care of newborn in radiant warmer and incubator.
- Kangaroo mother care.
- Assisting mother with exclusive Breast-feeding
- Feeding technique: Katori, spoon, naso/orogastric, Total Parenteral nutrition
- Assessement, calculation and administration of fluids and medications:
 - Oral
 - I.D.
 - I.M.
 - I.V.- Securing IV line, infusion pump

- Administration of drug per rectum
- Capillary blood sample collection.
- Oxygen therapy.
- Phototherapy.
- Chest physiotherapy.
- counseling Parental, bereavment, family planning, infertility etc
- Setting of operation theatre.
- Trolley and table set up for Obstetrical & gynaecoligical operations.
- Pap smear.
- Vaginal smear.
- Insertion of pessaries,
- Insertion of IUD and removal.
- Teaching skills
- communication skills
- Prepare referral slips
- Pre transport stabilization
- Networking with other stake holders

MALMAN

VERS

CLINICAL SPECIALTY -- II

PEDIATRIC (CHILD HEALTH) NURSING

Placement : II Year

Hours of Instruction Theory 150 hours Practical 950 hours Total : 1100hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Pediatric Nursing. It will help students to develop advanced skills for nursing intervention in various pediatric medical and surgical conditions. It will enable the student to function as pediatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

NALMA

At the end of the course the students will be able to:

- 1. Apply the nursing process in the care of ill infants to pre adolescents in hospital and community
- 2. Demonstrate advanced skills/competence in nursing management of children with medical and surgical problems
- 3. Recognize and manage emergencies in children
- 4. Provide nursing care to critically ill children
- 5. Utilize the recent technology and various treatment modalities in the management of high riskchildren
- 6. Prepare a design for layout and describe standards for management of pediatric units/hospitals
- 7. Identify areas of research in the field of pediatricnursing

Unit	Hours	Content
I 5		 Introduction Current principles, practices and trends in Pediatric Nursing Role of pediatric nurse in various settings -Expanded and extended
П	35	 Pathophysiology, assessment (including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities and nursing intervention in selected pediatric medical disorders Child with respiratory disorders: Upper respiratory tract: choanal atresia, tonsillitis, epistaxis, aspiration. Lower respiratory tract: Broncheolitis, Bronchopneumonia, Asthma, cystic fibrosis Child with gastro-intestinal disorders:
III	35	 Assessment(including interpretation of various invasiveand non-invasive diagnostic procedures), treatment modalities including cosmetic surgery and nursing interventions in selected pediatric surgical problems/ Disorders Gastrointestinal system: Cleft lip, cleft palate and conditions requiring plastic surgery, Tracheo esophageal fistula/atresia, Hirschsprungs' disease/megacolon, malrotation, intestinal obstruction, duodenal atresia,

		gastrochisis, exomphalus, anorectal malformation,		
		omphalocele, diaphragmatic hernia		
		• Anomalies of the nervous system: Spina bifida,		
		Meningocele, Myelomeningocele, hydrocephalus		
		 Anomalies of the genito-urinary system: Hypospadias, Epispadias, Undescended testes, Exstrophy bladder 		
		 Anomalies of the skeletal system 		
		 Eye and ENT disorders 		
		 Nursing management of the child with traumaticinjuries: General 		
		principles of managing Pediatric trauma		
		- Head injury, abdominal injury, poisoning, foreign body		
		obstruction, burns		
		- & Bites		
		• Child with oncological disorders: Solid tumors of childhood,		
		Nephroblastoma, Neuro blastoma, Hodgkin's/Non Hodgkin's		
		Lymphoma,Hepatoblastoma, Rhabdomyosarcoma		
		Management of stomas, catheters and tubes		
		Management of wounds anddrainages		
		Intensive care for pediatric clients		
		□ Resuscitation, stabilization & monitoring of pediatric patients		
		 Anatomical & physiological basis of critical illness ininfancy and childhood 		
IV	10	 Care of child requiring long-termventilation Nutritional needs of critically ill child 		
1 V	10	 Legal and ethical issues in pediatric intensivecare 		
		 Intensive care procedures, equipment and techniques 		
		\square Documentation		
		High Risk Newborn		
		 Concept, goals, assessment, principles. 		
		Nursing management of		
		• Post-mature infant, and baby of diabetic and substance use mothers.		
		Respiratory conditions, Asphyxia neonatorum, neonatal apnoea		
		meconium aspiration syndrome, pneumo thorax, pneumo mediastinum		
		Icterus neonatorum.		
		 Birth injuries. 		
		 Hypoxic ischaemic encephelopathy 		
V	20	 Congenital anomalies. 		
	20	• Neonatal seizures.		
		 Neonatal hypocalcaemia, hypoglycemia, 		
		hypomagnesaemia.		
v		Neonatal heart diseases.		
		Neonatal hemolytic diseases		
		• Neonatal infections, neonatal sepsis, opthalmia		
		neonatorum, cogenital syphilis, HIV/AIDS		
		Advanced neonatal procedures.		
		Calculation of fluid requirements.		

		• Homotological conditions conthroblastopic fotolic			
		• Hematological conditions – erythroblastosis fetalis, hemorrhagic disorder in thenewborn

		Nursing intervention-counseling			
		Drugs used in Pediatrics			
	5	 Criteria for dose calculation 			
		 Administration of drugs, oxygen andblood 			
IX		 Drug interactions 			
IA	5	 Adverse effects and their management 			
		Administration and management of pediatric care unit			
		□ Design & layout			
		□ Staffing,			
X	10	Equipment, supplies,			
	10	Norms, policies and protocols			
		Practice standards for pediatric care unit			
		Documentation			
		Education and training in Pediatric care			
		 Staff orientation, training and development, 			
XI	5	□ In-service educationprogram,			
A.S.	6×	 Clinical teaching programs. 			
*					

Total = 960 Hours 1 Week = 30 Hours

• Field visits:

S. No.	Deptt./ Unit	No. of Week	Total Hours
1	Pediatric medicine ICU	4	120 Hours
2	Pediatric surgical ICU	4	120 Hours
3	NICU	4	120 Hours
4	Pediatric OT	2	60 Hours
5	Pediatric medicine ward	6	180 Hours
6	Pediatric surgery ward	6	180 Hours
7	Emergency/Casualty	4	120 Hours
8	Field visits*	2	60 Hours
	Total	32	960 Hours

*Child care center, Anganwadi, play school, Special schools for challenged children, Juvenile court, UNICEF, Orphanage, Creche, SOS village

Essential

I. Procedures Observed:

- Echo cardiogram
- Ultrasound head
- ROP screening (Retinopathy of prematurity)
- Any other

II. Procedures Assisted

•

- Advanced neonatal life support
- Lumbar Puncture
- Arterial Blood Gas
- ECG Recording
- Umbilical catheterization arterial and venous
 - Arterial B P monitoring
- Blood transfusion- exchange transfusion full and partial
- IV cannulation & therapy
- Arterial catheterization
- Chest tube insertion
- Endotracheal intubation
- Ventilation
- Insertion of long line
- Assist in surgery

III. Procedures Performed:

- Airway Management
- Application of Oro Pharyngeal Airway
- Oxygen therapy
- CPAP(Continuous Positive Airway Pressure)
- Care of Tracheostomy
- Endotracheal Intubation
- Neonatal Resuscitation
- Monitoring of Neonates clinically & with monitors, CRT(Capillary Refill Time), assessment of jaundice, ECG
- Gastric Lavage
- Setting of Ventilators
- Phototherapy
- Assessment of Neonates: Identification & assessment of risk factors, APGAR Score, gestation age, Anthropometric assessment, Weighing the baby, Newborn examination, detection of life threatening congenital abnormalities,
- Admission & discharge of neonates
- Feeding management of breast feeding, artificial feeding, expression of breast milk, OG(Orogastric) tube insertion, gavage feeding, TPN, Breast feeding counseling
- Thermoregulation- Axillary temperature, Kangaroo Mother Care (KMC), Use of Radiant warmer, incubators, management of thermoregulation & control
- Administration of Drugs: I/M, IV injection, IV Cannulation & fixation infusion pump, Calculation of dosages, Neonatal formulation of drugs, use of tuberculin/ insulin syringes, Monitoring fluid therapy, Blood administration.
- Procedures for prevention of infections: Hand washing, disinfections & sterilization, surveillance, fumigation
- Collection of specimens
- Setting, Use & maintenance of basic equipment: Ventilator, O2 analyzer, monitoring equipment, Photo therapy unit, Flux meter, Infusion pump, Radiant warmer, incubator, Centrifuge machine, Bilimeter, Refractometer, laminar flow

IV. Other Procedures:

CLINICAL SPECIALITY - II

PSYCHIATRIC (MENTAL HEALTH) NURSING

Placement: II Year

Hours of Instruction Theory 150 hrs Practical 950 hrs Total : 1100Hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various psychiatric conditions. It will enable the student to function as psychiatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

11.

At the end of the course the students will be able to:

- 1. Apply the nursing process in the care of patients with mental disorders in hospital and community
- 2. Demonstrate advanced skills/competence in nursing management of patients with mental disorders
- 3. Identify and care for special groups like children, adolescents, women, elderly, abused and neglected, people living with HIV/AIDS.
- 4. Identify and manage psychiatric emergencies.
- 5. Provide nursing care to critically ill patients with mental disorders
- 6. Utilize the recent technology and various treatment modalities in the management of patients with mentaldisorders
- 7. Demonstrate skills in carrying out crisis intervention.
- 8. Appreciate the legal and ethical issues pertaining topsychiatric nursing.
- 9. Identify areas of research in the field of psychiatric nursing.
- 10. Prepare a design for layout and describe standards for management of Psychiatric units/emergency units/hospitals

Teach psychiatric nursing to undergraduate students & in-service nurses.

Procedures Observed

- 1. **Psychometric tests**
- 2. Personality tests
- 3. Family therapy
- 4. Assisted
- 5. CT
- 6. MRI
- 7. Behavioral therapy.

Procedures Performed

- Mental status examination 1.
- 2. Participating in various therapies – Physical; ECT,
- 3. Administration of Oral, IM, IV psychotropic drugs
- 4. Interviewing skills
- 5. Counseling skills
- 6. Communication skills
- 6. 7 Psychoeducation
- Interpersonal relationshipskills
- 9. Community Survey for identifyingmental health problems
- 10. Rehabilitation therapy
- 11. Health education and life skills training.
- 12. Supportive psychotherapic skills
- 13. Group therapy
- 14. Milieu therapy
- Social/Recreational therapy. 15.
- 16. Occupational therapy.

CLINICAL SPECIALITY – II COMMUNITY

HEALTH NURSING

Placement : II Year

Hours of Instruction Theory- 150 hours Practicals- 950 hours Total- 1100 hrs

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of community health nursing. It will help students to develop advanced skills for nursing intervention in various aspects of community health care settings. It will enable the student to function as community health Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of community health nursing.

Objectives

At the end of the course the students will be able to:

- 1. Appreciate trends and issues related to community health Nursing- reproductive and child health, school health, Occupational health, international health, rehabilitation, geriatric and mental health.
- 2. Apply epidemiological concepts and principles in community health nursing practice
- 3. Perform community health assessment and plan healthprogrammes
- 4. Describe the various components of Reproductive and child health programme.
- 5. Demonstrate leadership abilities in organizing community health nursing services by using inter-sectoral approach.
- 6. Describe the role and responsibilities of community health nurse in various national health and family welfare programmes
- 7. Participate in the implementation of various national health and family welfare programme
- 8. Demonstrate competencies in providing family centered nursing care independently
- 9. Participate/Conduct research for new insights and innovative solutions to health problems
- 10. Teach and supervise nurses and allied health workers.
- 11. Design a layout of sub center/Primary health center/Community health center and develop standards for community health nursing practice.
